About EduParatos

EduParatos is a complete School Management Software with a collection of different modules that helps a school management to operate it very easily. EduParatos is designed & developed with the highest layer of security thus assuring the software to be Reliable & Robust. The software is user friendly & easiest software to operate till date. This has been possible because of the Engineers who have pioneered the software keeping the International Standards at their highest priority. The another highly innovative feature is that the software is built on OPEN SOURCE technology such as JAVA, My SQL etc that means our clients do not have to buy any additional licence in the lifetime. The software boasts itself of being OS independent software & hence it can run on any Operating system may it be Windows, MAC, Linux/Unix etc. The mechanism of the software is highly adaptive as it can run on both LAN as well as standalone. Please note EduParatos is totally dynamic software and is always ready to be customized with your needs.
