AARUSH SYSTEMS >

Aarush Systems is dedicated to improve and enhance every functional aspect of the education institutions by offering a unique and highly competitive **ERP + CRM + LMS + MIS** product. Campuspedia software ensures smooth and flawless interaction between students, faculty, administration, parents & companies to impart a better education experience.

Competitively priced, Campuspedia software comes with an assured reliability, 24x7 support and designed by people having subject domain expertise and a personalized understanding of the Indian education system. Little wonder that Campuspedia is widely used and appreciated by many reputed institutes pan-India.

Our end-to-end technology solutions are used to quickly reach more students, in cost-effective, personalized ways, keeping everyone involved, informed, collaborative, while meeting the highest expectations of today's students and their parents alike.

VISION

To provide strategic management solutions to colleges, transforming and improving Teaching - Learning process that support the needs of students, parents, faculty, companies and management

ABOUT THE PROMOTERS >

An excellent techno-commercial professional team with more than 50 years of industrial experience and possessing excellent leadership and communication skills, with in-depth technical knowledge, proven problem solving abilities, superior consulting and business analysis skills to effectively identify and translate business requirements and end-user needs into cutting-edge IT solutions in reasonable budget with high-quality deliverables.

CAMPUSPEDIA > (A Campus Management System hosted on Campuspedia.org)

Campuspedia is an intranet-based, e-education secure platform designed to enable hassle free management of educational institutions under one umbrella by connecting people with superior technology. For institutions offering higher education, Campuspedia is the only comprehensive education technology platform that comes with the support staff and programs to help you achieve all your academic goals viz.,

- Student Life Cycle Management from admission enquiry to alumni tracking
- Facilitates smooth administration and management between various departments within the institute.
- Being a cloud application, Campuspedia software can be accessed from anywhere on any computer at any time.
- Role-based access and privileges for students and teachers
- Teaching and Learning
- Publishing, managing and organizing large volumes and a wide variety of content ranging from registrations, accounting, reporting to maintenance.
- Content Management and Sharing
- A centralized and organized knowledge repository to capture, store, index and preserve critical information
- Community Building
- Community driven experience

CAMPUSPEDIA IS BUILT ON THE FOLLOWING PILLARS >

ADMIN MODULE

This module managed by the Admin, Accountant and Registrar enables setup and maintenance of the institute, registration of students, managing holds, report generations and managing students, fees payments, accounts, fines, refunds, ID cards, bank verifications, salary, purchases, social welfare. AICTE/ DTE / UGC compliance etc. The registration phase helps in maintaining personal details of the candidate and printing the applications for enrollment. The accounting module deals with the payments, receipt generations for academic, transport & hostel fees and document collection. Tools are provided for monthly report generations, fees report generation for a particular candidate, year, course, institution, organization etc. In addition to this, posting fines and managing holds serve as an addition to this powerful tool.

FACULTY MODULE

The faculty module helps to manage the student information, based on their overall performances including grades, attendance, term works, tests, result analysis, etc. Facilities have been provided to conduct online tests. Faculty can post and view announcements related to the respective subjects to all or selected students. Tools have also been provided to upload assignments, lecture notes, syllabus, previous question papers etc.

MISSION

Innovation and R&D are amongst the key focal points for Aarush Systems. Our thoughtfully designed solutions will prove to be 'Innovative' and finally lead to sustained growth in any given field of application, by eliminating tedious and mundane tasks gaining autonomy in the process.

STUDENT / PARENT MODULE

The student's module forms the base of Campuspedia. The assignments, question papers, lecture notes, media news, articles uploaded by faculty can be easily accessed by students. They can also enjoy the benefits in the form of online lectures, online exams, forums etc. Students are also provided with an android application providing flexibility and access on the move.

COMPANY / TPO

Companies can directly see the students profile, performance on various topics and compare them with peers. Companies can also post jobs, shortlist students based on various criteria, hold tests online without coming to campus thus saving resources while finding the perfect match for their job
