ERP Solution for  
Process Manufacturing

## Accounts

- » Maintain Customer data like Customer item's price, discounts available, etc
- » Maintain Vendor specific Item data , pricing & discounts
- » Generate Quotations, Sales Orders, Purchase Orders & Invoices in hassle free manner

## Quality Control

- » In House testing facility for both raw materials & finished goods
- » Auto Inventory update facility based on the Test Results
- » Lab Report Testing facility
- » Pre-dispatch (sales) and field stability testing

## Inventory Management

The inventory Module provides a powerful and flexible set of features to help you manage and report your inventory information.

### Some of the features include:

- » Multiple Locations and Warehouses maintenance
- » Inter-Branch Moves and Transfers
- » Various inventory classifications facilities based on Product, Item Type, Sub types
- » Physical Properties Management: Ability to define Specifications for raw materials & finished goods, to be later used by QC to validate the values.
- » Instant update of inventory cost and quantity after every action

## Formula Management

Formulas definition forms the heart of any process manufacturing and BatchPro provides most comprehensive Formula Management system.

- » Unlimited Inventory materials manufacturing instructions
- » Size by weight, volume or physical property
- » Material substitutions, if necessary
- » Reformulation by target value of physical property or yield
- » Yield analysis capabilities

## Production / Batch Processing

Production or Batch processing forms the crucial component of manufacturing industry. Challenges include tracking the batches and the yield of that batch. BatchPro keeps a track of not only the batches that are to be executed, but also the different machines being used as a part of batch processing.

**Some of the key features are:**

- » Auto Check facility for available machines viz., Reactors, blenders, storage tanks etc
- » Controlled batch processing mechanism
- » Shift Log Sheet – Integrated batch monitoring system
- » Batch material Yield testing & reporting facility

## Logistics Management

Logistics management is an exclusive feature provided as part of BatchPro. It helps in tracking all the material dispatches & receivables in a remarkable way.

**Some of the key features are:**

- » Material Inward & Outward tracking with date & time
- » Linked to Quality Control for confirmation on raw material & finished good testing reports
- » Goods Loading & unloading control based on QC reports
- » Monitoring & storing Loading information
- » Account reconciliations facility for goods

## Reports

BatchPro provides customized report generating feature.

**Below are some of the reports which can be generated:**

- >> Visitor / Employee attendance
- >> Raw material stock summary
- >> Finished goods stock summary
- >> Shift log sheet (production report viz., operations, persons involved, values provided etc., on any given date)
- >> Testing reports
- >> Material Transaction Report
