

Prompt Hospitality Solution

Whether you manage a single Hotel or a global chain of hotels and resorts, Prompt Hospitality has everything you need to get more out of existing assets. Prompt Hospitality is a fully integrated Enterprise Resource Planning (ERP) solution that includes financial management, material management, multi-site and multi-company financial consolidation, and reporting tools. The system also includes interfaces with Point of Sales (POS) systems. It is built with added features to support the unique requirements of the Hospitality Industry.

Prompt Hospitality is a proven solution already used by over 100 hotels in over 3 countries as well as many leading local and independent locations. Integrated with the other Hospitality products, Hospitality is the ideal solution for hotel and restaurant management companies and independent hotels who want extensive, integrated process support with improved security and control, a low total cost of ownership, proven rapid implementation methodology, locally compliant, with worldwide availability that gives a fast return on investment.

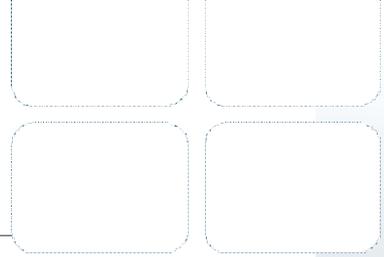

Features

Prompt Hospitality includes a number of standard Hospitality modules that together provide world class support for the hotel, restaurant and hospitality focused businesses with interfaces to many POS, time and attendance, and other systems.

- Prompt Hospitality's interface provide the integration needed to directly capture data from the front desk and other integrated systems (e.g. mini-bar and telephone usage). Double entry of data is no longer required, reducing cost and the risk of human error while increasing accuracy and the speed of information. Data can flow without human interaction directly from all the way to the Hospitality General Ledger if required for example during overnight update from other systems. The update log can later be reviewed to ensure that any errors are dealt with in a timely manner.
- Prompt Hospitality can integrate to hotel POS solution, and includes a flexible interface that supports flat files, CSV files, and XML data integration. The solution can separately import the city ledger and revenue ledgers.

About Prompt

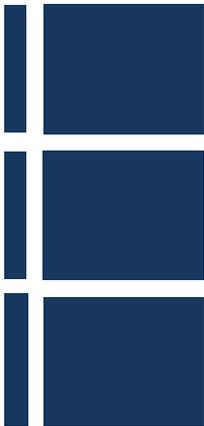

Prompt is a global leader delivering business software solutions to the manufacturing, distribution, retail, hospitality, healthcare and services industries. Founded in 1992, Prompt serves 7,000 customers in more than 3 countries, providing solutions in over 30 languages.

- Requisition management is a time consuming activity that most hotels cannot manage without efficient ERP system. Prompt Hospitality is designed so that entering and approving requisitions can be split between two or more roles. Junior staff can be allowed to enter replenishment requests either as the need is identified or during slower periods such as night shifts. These will then be held until approved staff release the requisition, at which time stock can be moved between stores or purchase orders created.
- Efficient handling of cash and the integration of ERP and Point of Sale (POS) systems can make the difference between profit and loss in the hospitality industry. Prompt Hospitality has a flexible integration to POS systems that can support most POS solutions so that details of actual consumption.
- Material Management functionality built to support the food, beverage and other material needs of Hospitality including multiple unit of measurement (UofM) with automatic conversion so that items can be purchased, stored and used in different UofM. Warehouse Management capabilities include support for both traditional and commissary items.
- Hospitality standard reports to quickly let hotels gain efficiencies through better monitoring of financial and materials activities. The Hospitality Reporting Tool includes many sheets, daily and periodical reports to provide improved visibility into daily activity with the ability to prepare and analyze budgets and forecasts with up-to-the second information.
- Hospitality Service Connect is a well proven and robust solution to integrate many different systems and enables hotels and other hospitality outlets almost eliminate duplicate data entry.
- The moment a report is printed it is out of date. Hospitality includes the tools and solutions to present information on line via windows or web based screens giving hospitality users the ability to operate in a virtually paperless environment.
