

PODIUM

SCHOOLING MADE EASY

PODIUM : THE BEGINNING

“ As a parent myself of two wonderful girls, I always wondered how to keep a balance between my work/passion and taking good care of my girls, especially keeping track of their education. I wanted to be more involved with what they were doing at school. Being the CEO of Polus Software, it was my responsibility to lead from the front which involved working long hours and it was difficult for me to adhere to their schooling needs with my physical presence. Naturally, working in IT sector specifically in the Educational domain and a tech savvy myself, a thought occurred to me one day to simplify the processes at schools with the help of technology. I set up a team of seven to spread out and look into the idea to make it a reality. Based on enormous research, questionnaires and surveys in schools at different geographical area, we understood the main grievances of parents, teachers and most importantly the students. Thus, a solution was born named “**PODIUM**” – an interactive platform involving teachers, parents and students to communicate from anywhere anytime”

Sabari Nair

PODIUM OVERVIEW

- Interactive communication between Teachers, Parents and Students to perform academic tasks.
- Suitable for small, mid size and large institutions
- More than 35 modules available
- Mobile App enabled
- Data Security and Reliability
- 24/7 Customer Support and Free upgrades
- Highly customizable framework – unique solution for each institution

PODIUM : FACTS & FIGURES

- From our survey, for a particular period a teachers spends **60%** time to give lectures and **40%** time to dictate notes. **40%** of this time is saved by uploading notes to Podium
- Podium reduces **80%** of teachers' time to **55%** otherwise used to manage student data and academic activities physically
- **3 out of 5** parents finds it difficult to track their child's academic progress in line with their work
- Podium is committed to eco- friendly environment by reducing the usage of paper
- **79%** of softwares are pure ERP systems with no interactive platform

COMPARISON

ERP SOFTWARES	PODIUM
Slightly Dynamic	Completely Dynamic
All Modules are interlinked with each other	Can act as Independent Modules
Higher Infrastructure & Cost	Comparatively Lesser Infrastructure & Cost
Not an Interactive platform	Flexible End to End Communication
Upgrades are complicated	Painless Upgrades
Integration to stand alone systems difficult	Can integrate easily with other systems and even act as main website of school
