

One of the biggest predictors of a student's success is collective efforts & involvement of parent, teacher, staff.

**EDIT** is a result of our continuous research and a step towards achieving student's success with the power of technology and essence of human touch. When we started the research we spent major efforts on discussing with the industry veterans to understand their views, challenges & expectations.

Our vision was clear and it was to develop an efficient tool to assist institutes with effective management, help teachers to reduce the burden of non-teaching activities, help the support team to contribute with their best of the abilities by focusing on their KRA(Key Responsibility Area), keep parents informed about their child's progress and allow everyone to focus on their key target, that is student's overall growth.

EDIT is a cutting edge Institute Management system which provides a communication channel between student and teacher, teacher and parents which work as a good interaction tool.

RFID compatible library solution is a hi-tech Library Management System which manages categorized inventory, track books with its allocation, availability and request queue with detailed reports.

Accounts Management System records all the financial transactions of the organization like Fee Collections with Balance Fees and Collection Report, Donations, Income and Expenses entries with reports.

Hostel and Kitchen management is an industry standard system which manages Room Records along with Incident logs, Accommodation Process, Room and Kitchen Inventories, Menu and Dining Time tables.

Assignment allocation with configurable publication system is a one step process for teachers to assign homework or topics for self-study. Submission supported with the evaluation, grading and marks system along with comments and reassignment capability.

EDIT provides a very effective and robust Transport management which captures all the data related to vehicles/vendors, its GPS enabled tracking system provides real time tracking of the vehicles and informs parents and management.

EDIT can be integrated with Swiping or Biometric Devices, GPS tracking for accurate records. SMS API and Bulk Mail for effective communication. Payment Gateway for secure online transactions.

HRM is a Full-fledged Human Resource (HR) Management system to record all the details of employees, their professional and personal details, Leave Management and Salary Management.

Informative and interactive parent module keeps parents updated on child's progress, results, attendance, performance and academics. It bridge parents-teachers on single platform to interact and support student to excel.

The student management system works across the student's educational life cycle. EDIT's secure data storage system manages extensive information systematically and helps management and teachers to plan individual student's growth.

# Product Features

---

## Student Management

- Student Details
- Parent Details
