# AFFORDABLE, ROBUST, AND PROVEN CAMPUS ERP

**FOR SCHOOLS, COLLEGES & UNIVERSITY**  
**Let us SHOW YOU what technology can do.**

## Why Most ERP FAIL

Most ERP implementations fail and the reason why!

## Benefits

How is VClassrooming different and what can we do for YOU

## Features & Pricing

Efficient Teaching and Managing with price that fits every Pocket.

# WHY MOST ERP'S FAIL

---

## 1 SELECTING **WRONG** ERP

When selecting a campus management ERP, the most essential thing to keep in mind is whether the software would understand your style of working, institution structure and above everything else will it increase or decrease your work.

If it does not decrease your work and increase productivity, you are ought to see a lot of employee resistance. Selecting an ERP that can manage your micro and macro task is very important.

## 2 TRYING TO DO **EVERYTHING** TOGETHER

Automating task and implementation of ERP is process and no matter what you can't avoid going through this process.

The implementation process should be divided in to task that can be measured and divided.

Implementing all modules/features at the same time is not the right way to go about it. Doing so you try to over burden yourself with too many thing to learn, understand and implement.

Taking up basic modules to start with is the best way to go for beginners. The ones already using some sort of technology to manage data can skip this and move to advance modules.

**VCLASSROOMING** TAKES CARE OF ALL YOUR MACRO AND MICRO TASK, GIVES YOU TECHNOLOGY THAT BLEND IN WITH YOUR CAMPUS CULTURE MAKING IT EASY TO ADAPT.
