Laboratory Information Bliss™

Freezer^{PRO}

Sample Management System

FreezerPro was designed purely for sample management. This focus allows it to eliminate wasteful inefficiencies and help streamline laboratory production without the resource requirements associated with adopting a LIMS.

FreezerPro enhances user's ability to work, collaborate and learn through traceability, automation, configurable reporting, communication tools and hardware support. For thousands of users worldwide, FreezerPro is Laboratory Information Bliss™.

FreezerPro Editions

By combining FreezerPro with an Electronic Laboratory Notebook, such as RURO's Sciency ELN, users gain a complete information management solution to organize, capture, share and store experimental data notes and associated sample records.

When users work with FreezerPro complementing a LIMS, such as RURO's LIMS 24/7, they are given precise tools and functionality for sample management.

FreezerPro is compatible with many Barcoding and RFID hardware scanners, readers and printers.
