

A one-stop inventory and order management solution for pharma retailers.

FEATURES

Simple & easy to use User Interface

Enhanced user experience by reduced clutter on the screen and focus on frequently used features.

Automatic backup with internet

Don't let network issues stop your business. Your inventory will automatically update when you are online.

Accept payments through cards and e-wallets

Enhance customer service by accepting payments through all credit/debit cards.

No waiting in queue for Customer Support Issues

Support issues are resolved instantly with our inbuilt Chat function.

Know what to sell

Don't let your old stock be forgotten. Optimize your sales with instant alerts and notifications on older batches.

Upload inventory through e-mail

Add items in inventory by just a few clicks through automatic mapping. Avoid wasting time in uploading multiple types of files.

Integrated with Distributors to enable online ordering

Automate the drug ordering process & barcoding through Auto Place Order.

Alerts and notifications

Be on top of your business with instant alerts and notifications on stock expiry, purchase orders and customer orders.

Carry your business everywhere

View instant stock and sales reports on mobile, tablets or your personal laptops.

Smart Procurement

You can now place orders more efficiently based on purchase price, latest schemes and delivery times.
