Ayoga

Create Connect Collaborate
Build Lean in Every Step

DesignSense

Reducing Cost & Complexity of Engineering

About Ayoga

Ayoga is a Cloud based collaboration platform that simplifies Project management, end to end.
Different technologies in one platform for the right information at the right time;
With Ayoga, strategize better, deliver project milestones & take well-informed business decisions.

Project Insights

Interactive **dashboards** for real time visualization.
Draw advanced **analytics** for well informed business decisions

Plugins

Connect Engineering, Site and Drawing data to the Project Plan.
With **CAD** Integration, Create **markups**, address site issues and **Visualize** Real Time Project Progress

Real Time 360° View of your Projects

Project Planner

Plan in the cloud, Track in **Real Time**. Connect all Project drivers to make your Projects **LEAN**

Modernize your Business Approach

Drive a LEAN Project-Centric approach with EPP

IoT

Empower your Field Assets with IoT; Geo-Track, Mobilize and **Optimize resource** utilization across Projects

ActBOT

A **Chat** based application that connects teams, Project data and Field Reality. Stay **notified**, update progress or address issues with simple conversations, On the Move !

Cutting Edge Technologies for simplified Project Management

Billing

Associate **project budget** to the Project Plan.
Map gap between billed and actual work to simplify cashflow management

Transmittals

Digital **record** of documents sent for review.
Trail communication and revisions for easy tracking and expedition of **Approvals**

### Reduce Response Cycle Time; Transform Project Delivery

RFI

Collate entire project **communication** to be organized and trackable.
Create accountability, expedite information flow, engage stakeholders, for **quick decision** making

DMS

Create and share repositories for automatic **version controlled** access to project documents and drawings

Workflows

Standardize your **business processes.** Define templates, streamline workflows and digitize implementation for seamless business transactions

### Digitize Project transactions for accountable & accelerated decision making

Checklists

Digitize Authentication.
Define checklists to simplify **validation** of various execution and **quality** parameters

Multi-Dimensional Collaboration

Location
Designs
Resources
Projects
People

Ayoga for You

As an **Architect, Sonia** has to ensure site progress is in sync with the latest drawings, updated on the **DMS.** With **RFI-CAD Plugins**, she can easily address site engineering issues, without actually visiting the site

Different **Dashboards** on Ayoga, provide **Arun** the necessary insights for smarter business decisions. As a Senoir Manager, Arun can now focus on building strategies than chasing information

Now let your **Resources** do the talking ! **IoT** enabled resources can be geotracked, **geofenced** & monitored for utmost optimisation

Ayoga **Mobile** & **ActBOT** are **Mark's** gateway to latest Project Information on the **Field**. Mark updates site progress, fills quality **checklists**, creates drawing **markups**, simply on the move.

With the **Planner Tina**, a **Project Manager** can set up projects on the cloud & keep her team updated with the latest project plan, 24/7
