NEWTON Cloud Services

Cloud services

Microsoft Azure

Microsoft Azure is Microsoft's hyper-scale public cloud and cloud application platform. Azure provides integrated cloud services that span compute, storage, data, networking, and applications. The platform offers Microsoft-centric enterprises a smooth transition to the cloud with a hybrid cloud model that leverages an organization's existing Microsoft investments. The Azure Platform is supported by a growing network of Microsoft-managed datacenters, backed by Microsoft's \$15 billion (USD) investment in global datacenter infrastructure.

Cloud security with azure

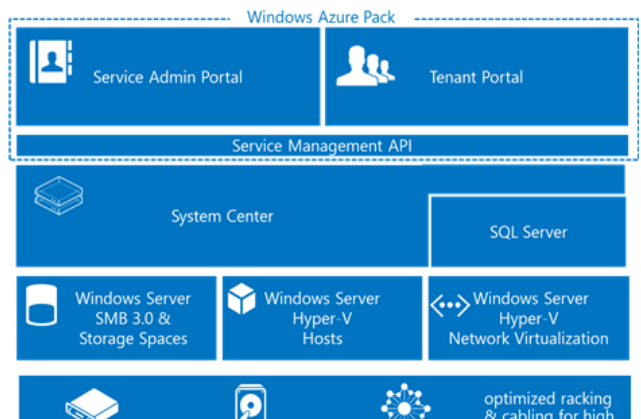

Azure includes a broad portfolio of built-in compliance and security capabilities, providing the same level of protection for all Azure cloud customers, including many of the world's largest financial institutions.

Fully managed and monitored infrastructure

Data backed up in a choice of geographies

Robust physical security and data protection

Microsoft-backed SLAs for uptime to 99.95%*

Cloud services
