

 **Eazy School**TM
Empowering School Administration

It is estimated that an educator spends at least **30 days** in a year doing **repetitive administrative work:**

Taking attendance manually

Photocopying notes & study-material

Creating & printing Report cards

Issuing circulars & notices

Handling printed database of student information

30 days = 240 working hours

240 hours X 100 staff =

24,000 man hours / year

That's a lot of wasted time!

All this time could have been spent in much more productive tasks such as **Teaching.**

That's what educators get paid for!

Many Institutions already use **school administration software** to tackle this problem. However, this rarely solves anything because most software are:

Cumbersome & Frustrating to use

Have outdated features & technologies

Expensive to setup & maintain

Require ideal conditions to work effectively

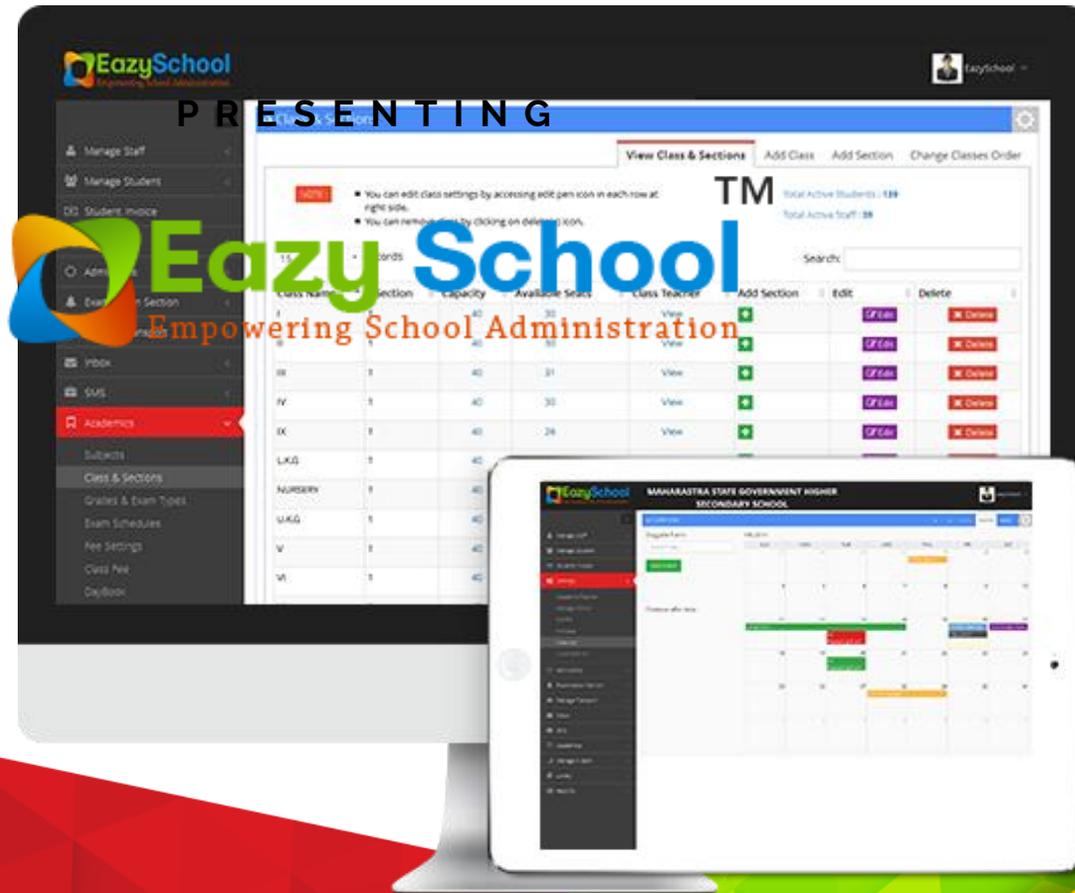

Therefore we wanted to create a solution which addresses the need for school administration automation **without creating these additional problems.**

A state-of-the-art online software that empowers each and every school to:

Create, Collaborate & Communicate

798k students

852 schools

3 countries

...and the only solution in the market which has been designed to tackle the challenges faced by **Indian educational institutions.**
