KIO Coaching Classes Software

KEY FEATURES of our web-based, integrated software application:

Dashboard: (accurate, dynamic data display and highly interactive)

- Each student and faculty member has access to data relevant to their defined role in the system.
- Under "My Alerts" and "Course Details" section, our interactive software efficiently *communicates back* to the user with display of pending actions for taking the necessary, corrective steps.
- System sends SMS/emails automatically to students thus saving valuable faculty time in follow-ups.
- Favorite reports are defined for each user as per need, so a frequently used report can be accessed from the dashboard itself on a single click.
- A Comparative Analysis section containing various graphs whose parameters change dynamically depending on who has logged in. For example, a student will see parameters relevant to that student's individual profile only, whereas a faculty member will see all students' data belonging to the batch assigned to that faculty.
- Tip of the Day, important notices and updates can be posted by the faculty on the dashboard screen in real-time for viewing by all students.

Transactions: (with quick Search facility on each screen)

1. Enquiry, Follow-ups and Registration Management:

- Counselors/Administrative staff can record enquiry related student data quickly & easily
- A follow-up screen helps to record status with follow-up dates for enrollment and has in-built SMS and email integration for auto-reminders to students & faculty
- Student can be registered from the Enquiry screen itself with auto-generated Welcome message sent to the student's registered email ID and/or mobile phone.

2. Fees Management:

- Record student-wise fee payment details such as fee amount, discount, tax, paid amount, paid date, mode of payment, installment number, balance amount with tax bifurcation, next due date etc.
- Next installment due is sent automatically as an SMS/email reminder to the student and/or faculty and also on the dashboard under "My Alerts" for follow-up and closure thereby reducing pending fee amounts for the Institute.
- Fee payment reminders appear automatically to students on their respective dashboards and also as an auto-generated SMS to their mobile numbers in advance of due date to avoid delays and penalties.

3. Profile screens:

- Student Profile**:** basic details + mapping to branch, course, batch, subjects, shift and division. The system can attach multiple documents (scans, PDF etc) for each profile.
  Student's ID card can be generated from the profile on paper/smart cards.
- Faculty Profile**:** basic details + qualifications/certifications/experience with mapping of each faculty to branch, course, batch, subject and batch timing.

4. Attendance:

- Recording of all students' attendance in each class by the teacher/trainer normally takes 30 seconds using our software. Can be integrated with biometric/card readers.
- Auto-triggering of SMS and/or email to parents for student absenteeism beyond a permissible limit defined by the Institute.

5. Audio Recording:

- Mock conversations between the Interviewer Trainer and the student once recorded can be uploaded directly to our system for play-back by students anytime later.

6. Student Performance:

- Once actual marks are entered against topics/subjects, the Average and Overall score is automatically calculated along with suggested new grade/level of the student.
- Our software moves students to higher/lower levels after each Test score, suggests the class to be assigned and also allocates the relevant faculty, all at the click of a button.
- Student Performance summary can be displayed on the Dashboard branch-wise, batch-wise, subject-wise, score-wise, level-wise etc.

7. On-line MCQ and Subjective Test: (optional)

- Students can take online tests: multiple choice + subjective type.
- To ensure only a valid student is taking the test, OTP verification is sent to the student's registered mobile number for authentication.
- Tests have a count-down timer to ensure students submit their answers within a defined time-frame. The Test screen de-activates once defined time period is over.
- Questions for each student taking a common MCQ test can be shuffled in a random sequence to avoid copying, cheating or anticipating next question.
- At the end of the Test, results can be seen immediately by students and faculty.
- MCQ and Subjective results for a batch are accessible to the relevant faculty on the dashboard screen. They can evaluate and give marks to Subjective answers on the system itself, making it a fast, paper-less environment.

8. Student Deviation: (optional)

- To record student behavioral issues/indiscipline/inappropriate behavior in class.
- An SMS and/or email can be automatically sent to parent's mobile number.

9. Student Feedback: (optional)

- Students can give a 360 degree confidential feedback about the Faculty, Infrastructure, Training effectiveness etc. to the Class management for improvement or use positive feedback as testimonials.
- Consolidated feedback with ratings for the quarter and year can be visible on the senior Management dashboard for immediate corrective and preventive actions.

Reports: (with quick Search facility on each report)

10. All Reports:

- Have a criteria filter, are well formatted, easily exportable to Excel.

BENEFITS

Reminders & Alerts

- Our coaching class software bridges the gap between the Coaching Institute, students and parents by regularly sharing attendance, performance, fees and other important information.
- Alerts and reminders set on the individual user's dashboard screen can help them prioritize and quickly take some action.

Performance & Progress

- When interfaced with bio-metric device, student and faculty attendance is logged automatically
- System can benchmark student's progress levels based on certain measurable parameters

Installation & Access

- Being web-based, users only require a browser (Firefox, Chrome or Internet Explorer)
- Students and Faculty can access the system ONLINE using their desktop, mobile, tablet or a laptop. In other words, the software is device independent.
- Minor customization to suit the Institute's specific requirements is possible.

SUBSCRIPTION or PAY-PER-USER (SaaS) MODEL

One of the biggest advantages of KIO Classes is our low-cost, monthly subscription model

- With a simple, user-friendly interface, the Coaching Institute can use the system effectively
- The software is hosted on-line on our servers available 24x7 throughout the year
- Periodic upgrades to our software are offered free of cost to all subscribers
