# IMonitor EAM Introduction Brochure
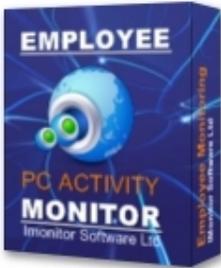

IMonitor EAM - Employee activity monitor

Centrolized company-wide employee pc activity monitoring solution

Record everything they do on the computer and internet from each of your employees, save that information into centralized database on server computer and provides you with more than 55 built-in reports to help you to analyze your employee's activities and answer your question like:

Which employee always use removable disk to copy comapany confidential document?

Which employee leak comapany confidential information via MSN?

Which employee spend so much time on non-work related websites?

Which employee print comapany confidential document?

Which employee play games during woring time?

Which employee always send eamil with attachments?

Who prepare to quit office, and want to take important technical document away?

How much time each of your employees wasted a day, a week, a month?
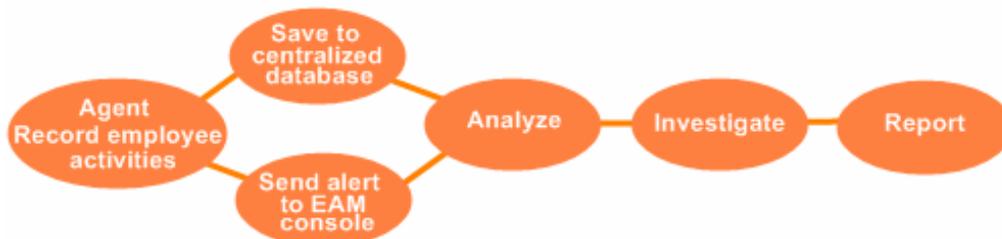

IMonitor EAM is IMonitorSoft's flagship solution for monitoring your employees company-wide -- whether they are in the office, traveling or working remotely -- even when they are not connected to the company network.
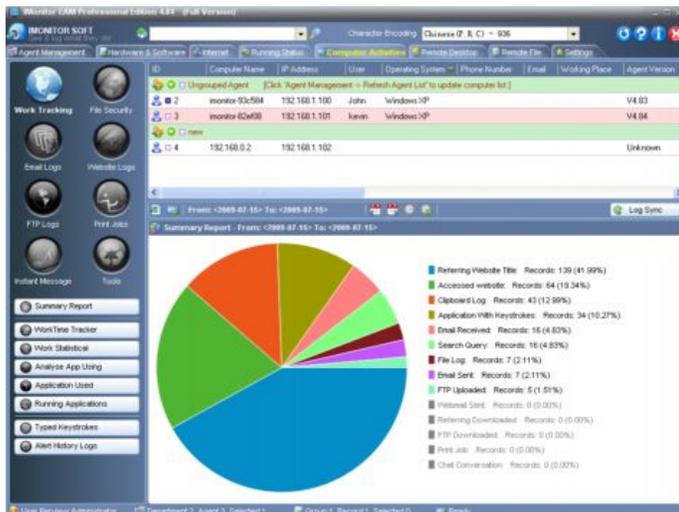

" I wanted you to know that I tried so many different employee monitoring softwares packages for my network and apparently yours is absolutely the best. I have already recommended it to several other system administrators who were looking for such a product. The interface is amazingly easy and intuitive and exceeded all of my expectations"

---Abigail, Comprehensive Regional Assistance Center, USA
