PROCESSMASTER

SIMPLYING **BUSINESS PROCESS**

Craft Optimum Perfection With a Scalable Solution

Be more insightful, analytical and coordinated with PROCESSMASTER ERP.

WHY **PROCESSMASTER**

BASIC STRATEGY

Choose a Software which is Simple to Use and Delivers Operational Excellence.
Opt for **PROCESSMASTER**

PROCESSMASTER ERP

PROCESSMASTER Enterprise Resource Planning software provides small and mid-sized businesses the power to manage their entire business and deliver value faster than ever. With solutions that cover every aspect of business management and manufacturing, **PROCESSMASTER** ERP lets you expand in your market sphere through enhanced collaboration, higher sales and better compliance with stringent regulatory mandates. Streamline your business functionalities and make informed decision with **PROCESSMASTER** to foster the wake of never before growth.

KNOW WHY **PROCESSMASTER** IS A WORTHWHILE INVESTMENT AT A GLANCE

PROCESSMASTER is the next-gen ERP that assists manufacturers comply with all standards and regulations that results in enhanced product utility and better sales performance.

CORE BENEFITS

- Seamless integration of various manufacturing functions
- Effective decision making with comprehensive set of data analysis tools
- Boosts productivity and profit ratios
- Optimizes product usage with better inventory control
- Offers company-wide visibility

THE WOW FEATURES

- Complete, feature-rich and centralized ERP solution
- Internal messaging system for improved communication
- Flexible and easy configuration
- Multi-location, multi-plant and multi-currency enterprise management
- Notifications and customized notifications

TECHNOLOGICAL SUPREMACY

- Backend of MS SQL Server for unmatched security
- Frontend of Microsoft .Net Framework, a robust and timeless technology
- Self-customizable
- Flexible deployment
- Short implementation cycle
- The finest architecture to support future enhancements

OUR INDUSTRIES

TOP INDUSTRIES

Every modern manufacturing industry considers ERP implementation for aligning their business functions and to seamlessly meet the complexities of expanding business environment.

PHARMACEUTICALS & LIFE SCIENCE

Pharmaceuticals & Life Science industry operates in a specialized environment where requirements are unique. A highly customized ERP package is required to meet the needs of a pharmaceutical company. Our strong domain expertise in this industry enable us to meet the most complex needs of pharmaceutical industry by providing them with a solution that is configured with industry specific functionality and can help the companies to break down the barriers between its different departments.

FOOD & BEVERAGES

Food & Beverage industry represents a diverse set of products & processes: fresh, frozen, chilled, & long shelf-life food & beverage products that are manufactured, distributed, imported, & marketed to consumers, retailers, catering services, and other manufacturers. PROCESSMASTER is a comprehensive, configurable food ERP software solution to enable industry best practices and meet industry regulatory requirements for today, tomorrow, and the future. This powerful technology provides the food and beverage producer's real-time information that covers the entire crop-to-product, block-to-bottle cycle.

COSMETICS & PERSONAL CARE

The market of fashion and trends is ever-changing. Cosmetic market is driven by innovation including new color pallets, treatments targeted to specific skin types and unique formulas concentrating on different needs.

PROCESSMASTER ERP provides the precise controls required by the cosmetic & personal care industry & other industries regulated by the FDA including lot control, quality testing, and batch document security & labelling etc. With this various quality control stages, can be incorporated into schedule.

CHEMICALS & PAINTS

Chemical & Paint manufacturers are facing a variety of challenges, including dealing with a volatile market characterized by fluctuating prices, changing demand patterns, increasing competition and heightened regulatory pressures.

PROCESSMASTER ERP for chemical and paints industry delivers a powerful combination of technology and comprehensive business applications, including key functionality built specifically for chemical companies. PROCESSMASTER ERP help chemical manufacturers maximize yields and reduce energy costs while simultaneously achieving quality standards.

OUR PRODUCTS

MODULES

PROCESSMASTER's purpose-built manufacturing solutions greatly benefits businesses by coordinating their workflow and reducing operational expenses.

MATERIAL MANAGEMENT

Manage your stocks on quantity and value basis and monitor their details in real-time for enhanced business performance.

PURCHASE & PROCUREMENT

Generate and track purchase orders and eliminate stockouts to achieve further procedural efficiency.

PRODUCTION MANAGEMENT

Production Management solution offers efficient scheduling and data management that reduces real-time production issues and improves productivity.

PLANNING AND SCHEDULING

Develop better understanding of material requirement and capacity to keep a check on inventory levels and costs.

SALES & DISTRIBUTION

Establish valuable relationships with your customers and achieve better collaboration with automated sales process.

ACCOUNTING & FINANCIAL MANAGEMENT

Gain supreme control over all aspects of accounting transactions, compliance management and revenue management to derive meaningful financial data.

QUALITY MANAGEMENT

Cut down your cost of quality, improve supplier performance and increase process predictability with effective Quality Management solution.

PURCHASE & PROCUREMENT

GENERATE AND TRACK PURCHASE ORDERS AND ELIMINATE STOCKOUTS TO ACHIEVE FURTHER PROCEDURAL EFFICIENCY.

PURCHASE & PROCUREMENT

Collaborate with your suppliers, meet the raising customer expectations and satisfy industry-specific compliances to optimize effectiveness of your business with PROCESSMASTER. Purchase & Procurement solution supports all phases of material management, material planning and control, goods receiving, purchasing, invoice verification and other to ensure a constant flow of information. The system also streamlines the procurement of packaging and raw material, sub assembly and every other non-inventory material. Make wiser purchase decisions, consider better procurement options, and get access to right inventory at right time and at right prices to realize the change for good.

CAPABILITIES

- Procurement of Raw Materials
- Automation of Purchasing and Reordering Processes
- Invoice Verification
- Generates Material Receipt Notes and Vendor Invoice
- Supplier Quote Evaluation
- Billing Process Management
- Indent Preparation and Approval
- Purchase Order Generation & Approval
- Vendor Evaluation
- Quotation Management
- Vendor Registration
- Vendor Approval & Analysis
- Vendor Rating

MATERIAL MANAGEMENT

MANAGE YOUR STOCKS ON QUANTITY AND VALUE BASIS AND MONITOR THEIR DETAILS IN REAL-TIME FOR ENHANCED BUSINESS PERFORMANCE.

MATERIAL MANAGEMENT

Material Management solution renders vast control over production and scheduling aspects to ensure efficient management of Work in Progress (WIP) activities. As is expected from a Material Management module, our intelligent system empowers manufacturers to carry enough products to effectively meet customer requirements while avoiding the upkeep of surplus stock that affects profitability. The system lets its users achieve end-to-end real time visibility, define and classify items for easy planning and allocation, coordinate movements of goods, assess inventory-related requirements and availability of finished goods, and much more to deliver goods on time and as per quality promised- which in turn helps to maintain a satisfied customer base.

FEATURES/CAPABILITIES

- Material Loan Management
- Branch Transfer
- Warehouse Management
- Purchase Return Note
- NRGP/RGP Management
- Sub-contractor Job Work
- Good Receipt Note
- Track Serial Numbers from Alpha To Omega
- Collect Shop Floor Data
- Costing
- Scrap Inventory Management
- Label Printing (Quarantine, MRN, Dispensing)
- Create and Manage Vendor RFQs
- Material Destruction Facility
- Multiple Locations Inventory Tracking
- Receive And Inspect Vendor Shipments
- Control Inventory
- Shipping and Receiving
- Perform Cycle Counting and Physical Inventories
- Indent Generation Against Planning
- Quarantine Material Management

PLANNING & SCHEDULING

DEVELOP BETTER UNDERSTANDING OF MATERIAL REQUIREMENT AND CAPACITY TO KEEP A CHECK ON INVENTORY LEVELS AND COSTS.

PLANNING & SCHEDULING

Planning and Scheduling solution offers businesses intelligent planning tools that associate a spectrum of advantages like higher productivity, reduced costs, elimination of stock shortage, boosted delivery performance and improved flexibility in making the demand schedule. Be it re-evaluation of present ERP system or replacement of existing spreadsheets, the system is an ideal mate that empowers manufacturers meet varying requirements of their specific industries with highest possible simplicity. Synchronize production schedule to plan, emphasize more on customer demand and manage supply and demand in real-time to increase throughputs and profit margins considerably with PROCESSMASTER's Planning and Scheduling solution.

CAPABILITIES

- Master Production Scheduling (MPS)
- Materials Requirements Planning (MRP)
- Reduces Costs by Limiting Inventory and Work in Progress
- Eliminate Over-production Waste
- Just In Time MRP
- Effective Resource Utilization
- Compress Manufacturing Lead-times
- Various Filter Functions
- Offers Realistic Dispatch List for the Shop Floor
- Eliminates Unnecessary Batching through Order By Order Planning
- Eliminates Delays By Planning In Just-In-Time Manner
- Acts as a Smart and Dynamic ATP (Available To Promise) and CTP(Capable To Promise) Tool

PRODUCTION MANAGEMENT

PRODUCTION MANAGEMENT SOLUTION OFFERS EFFICIENT SCHEDULING AND DATA MANAGEMENT THAT REDUCES REAL-TIME PRODUCTION ISSUES AND IMPROVES PRODUCTIVITY.

PRODUCTION MANAGEMENT

Product Management solution is apt for modern manufacturers who know how crucial it is to align customer demands and production by using real-time data and repeatable processes. PROCESSMASTER's Production Management being a complete end-to-end solution manages every aspect of product lifecycle, and optimizes the ability of manufacturers to effectively plan, design and engineer their product. The solution serves as a centralized knowledge repository for product history and processes while offer support for integration and data transfer amongst various enterprise users like project managers, salespeople, buyers and others that interact with product. Cherish numerous benefits like simplified work order creation, real-time connectivity, intuitive business intelligence, social collaboration and improved cost control with PROCESSMASTER's Production Management solution.

CAPABILITIES

- Recipe and Formula Management
- Work Orders Management
- Batch/Lot Manufacturing
- In Process Sample Management
- Speedup New Product Development
- Revision Management
- Approvals at Various Levels
- Electronic Record & Signature
- Bill of materials (BOM) Management
- Product Cost Monitoring
- Product Configuration
- Integrated Cost Rollup and Cost Updation
- Facilitates Planning and Scheduling of Products
- Mass Update and Mass Delete Functions
- Secure Data Management

QUALITY MANAGEMENT

CUT DOWN YOUR COST OF QUALITY, IMPROVE SUPPLIER PERFORMANCE AND INCREASE PROCESS PREDICTABILITY WITH EFFECTIVE QUALITY MANAGEMENT SOLUTION.

QUALITY MANAGEMENT

Use PROCESSMASTER's quality-focused tools that assist modern day businesses to cover up all the quality control aspects & assure that all products, procedures & performance are matching the pre-specified quality criterion without a single fail.

Quality Management solution streamlines the coordination of people, process and technology and support enforcement of quality activities across your entire manufacturing enterprise to bring continuous business improvements and maximum in-flow of revenue. Achieve and retain quality certifications, validate quality and process control in real time, eliminate potential risk of warranty issues or recalls and maintain a satisfied customer base with a technology that speaks perfection.

CAPABILITIES

- Raw/Packing/Finished Goods Material Sampling
- STS Preparation & Controlling
- Stability, STP and SOP Management
- Facilities For Re-testing a Material
- Raw/Packing/Finished Goods COA
- Worksheet/Record of Analysis
- Inspection of Returned Materials
- Label Printing (Sampled, Under Test, Approved, Rejected, Control Sample)

SALES & DISTRIBUTION

ESTABLISH VALUABLE RELATIONSHIPS WITH YOUR CUSTOMERS AND ACHIEVE BETTER COLLABORATION WITH AUTOMATED SALES PROCESS.

SALES & DISTRIBUTION

Savor amazed reactions of clients and affiliates when they see how you customize and configure a multi-facet complex product, provide an elaborated quote and enter a sales order right from your office desk- just like a Pro!

The customer & sales module of PROCESSMASTER is the essence of the system comprising of those tool sets which maximizes efficiency of your sales force by entailing the complete order processing functionalities. This includes direct quote-to-sales order conversion, full-featured order entry forms, revision tracking, sales analysis reporting and several such that corresponds with a professional business approach.

CAPABILITIES

- Sales Orders Processing
- Suitable Material Dispatch Planning
- Packing Slip Generation
- Performa Invoice
- Sales Return (Domestic, Export, Re-processing)
- Division-wise Stock
- Customer Data Management
- Branch/Depot Stock Transfer
- Statutory Form Management
- Integration With Finance Module
- Excise Invoice Generation like Domestic Sales, Export Sales, JobWork, Sample Invoice and Purchase Return

ACCOUNTING & FINANCIAL MANAGEMENT

GAIN SUPREME CONTROL OVER ALL ASPECTS OF ACCOUNTING TRANSACTIONS, COMPLIANCE MANAGEMENT & REVENUE MANAGEMENT TO DERIVE MEANINGFUL FINANCIAL DATA.

ACCOUNTING & FINANCIAL MANAGEMENT

PROCESSMASTER's perceptively designed flexible financial management features allow an easy tracking of your company's finances in a secured and accurate environment. The dedicated functionality streamlines every transaction and offer an instant access to all financial data without much ado. Be it summary views or transaction-level drill-down details, PROCESSMASTER is an ideal system to count on.

Manage and process the account payables and receivables, track every account activity, generate ledger and financial statements, budgets, financial reports and every other accounting operation in a hassle-free way with PROCESSMASTER's Accounting and Financial Management Solution.

CAPABILITIES

- Account Payables and Receivables
- General Ledger
- Cash Book/ Bank Book
- Group Summary
- Trial Balance
- Profit & Loss Account
- Bank Reconciliation Statement
- Balance Sheet
- Ageing Analysis of Debtors/Creditors
- Financial & Sales Analysis
- Manufacturing Analysis
- Cash Flow & Fund Flow
- Budget Planning
- Fixed Assets Management
- Duties & Tax Reporting
- Track Material, Labor and Production Costs
- Reconcile Financial Accounts
- Generate General Ledger Activities
- Produce and Distribute Advanced Financial Reporting
- Ad Hoc Report Wizard
- Inventory Monitoring & Analysis
