SISENSE

SIMPLIFYING BUSINESS ANALYTICS FOR COMPLEX DATA

The only business analytics software that lets you easily prepare, analyze and visualize both big and disparate datasets.

Sisense covers the full scope of data analysis in one BI software, from preparing complex data for analysis to creating dashboards with a wide variety of visualizations. Here's what you get:

Fastest Time-to-Insight

Instant deployment gets you up and running with your actual data in hours, not weeks, and without a data preparation nightmare.

Intuitive UI, Powerful Back-End

Empower users to analyze data without constraints of traditional BI. Explore, filter and drill down into complex data in any granularity and get instant answers to ad-hoc questions.

Minimal Total Cost of Ownership

Sisense gives you a single BI tool to prepare, analyze and visualize any type and size of data. No need to invest in data warehouses, additional tools or professional services.

Unparalleled Performance and Scalability

Run concurrent, ad-hoc queries and receive results in seconds, even when working with billions of rows, for unparalleled performance and scalability.

Sisense everywhere

Revolutionizing the Way You Consume Data

Sisense-enabled IoT devices broadcast business KPIs to all the senses, making consumption of insights immediate and simple. Using Artificial Intelligence to humanize data consumption, Sisense moves you beyond the screen, letting you interact more naturally with your data by asking questions and getting results in real time.

ANALYZE BIG AND DISPARATE DATA WITH COMPLETE AGILITY

Sisense gives your business a simple way to manage, analyze and visualize all your data. Built with award-winning technology, Sisense eliminates the need for additional system components and dedicated manpower, allowing you to setup a complete BI solution in days.

No Data Preparation Nightmare

The Sisense innovative In-Chip™ engine lets you run any query and receive answers on-the-spot without the need to prepare data in advance for each new question.

Instant Deployment

Our Single-Stack™ architecture takes you from data integration to visualization with a single BI solution, eliminating the need to use additional tools.

Test Drive Sisense From Start to Finish in 90 Minutes

Sisense is the only BI vendor that doesn't use sample data. We offer a full POC on your data to fulfill an actual business need - all in 90 minutes.

" SISENSE IS AGILE, FAST, AND SIMPLE FOR PEOPLE TO USE AND GET ANSWERS ON THEIR OWN. "

" SISENSE TOOLS SHOW A SMALL LAPTOP CAN CRUNCH BIG DATA. "
