## EMPOWERING YOUR VISION

EPPS is a people driven technology company that aims at providing ERP solutions, designed and developed for enterprises. Our aim is to constantly innovate our solutions to create value for our customers.

Introducing **EPPS Lite** - an ERP solution that helps small enterprises run their business with efficiency and accuracy.

A click to install model, EPPS Lite is easy to use. It gives you access to the essentials to get you started on your journey towards growth.

EPPS Lite uses the latest technology i.e. combination of Java & PostgreSQL. This gives us, the advantage of being a future ready platform that can easily accommodate any future technological advancements. This ERP solution can easily manage high volumes of data & growing number of users.

EPPS Lite ensures easy migration of existing customers from an old platform to a new one, seamlessly without any risks of data loss.

# EMPOWERING GROWTH

EPPS Lite empowers you to grow your business and improve efficiencies in your operations profitably. The specially designed modules help you get started on the road to growth and stability.

The mobile app functionality on EPPS Lite also allows for an uninterrupted workflow & facilitates better business decisions with up-to-date real-time data.
