Services

INTEGRATION

With the product integration support we offer the service to integrate software application with customer's other systems and work processes.

TRAINING

We have designed structured hands-on training programs. User training is organized into a series of training sessions to meet the learning needs of individual users.

SUPPORT

We focus on providing unique cutting edge technical support. Our dedicated customer care centre provides end to end support services and deliver superior custom experience.

UPGRADATION

We provide regular upgrades and upgradation. This offers performance improvements, implementation of the fixes and addition of new functionality.

Services

IMPLEMENTATION

We will facilitate superior implementation planning through planning such as gap analysis, implementation planning and final end user training on the software.

CUSTOMIZATION

If your organization has unique functional and technical requirements USM team works closely with you to build customized solution to meet your needs.

INSTALLATION

USM provides technical services either on-site or through extended remote support to assist with the installation and configuration of the software.

MIGRATION

We make sure a smooth transition of data from your previous school management software to USM our team takes care of data migration and required conversion of data.

Benefits to Teachers

USM helps teachers to focus more on academics tasks than on time consuming administrative functions.

- Attendance, marks and grade automation
- Upload classwork and homework online
- Class information and analytic reports on single click
- Manage online exams, assignments, projects and forums
- Track detailed history of performance of a student
- Improved quality of interaction between teachers and parents
- Easy access to detailed time table and lesson planner
- Availability of more time for students

Benefits to Parents

USM helps parents to get information about school activities- anytime, anywhere.

- Active participation in school activities
- Get detail school events and holidays calendar
- Regular instant updates on child's attendance, results and progress
- Paid fee, pending fee and upcoming fee details
- School circular and blog news

Benefits to Students

Students are given easy and user friendly way to access to the most accurate information in real time.

- Easy availability of classwork, homework and assignments
- Access to timetable, results, timetable, marks, exam schedule and books status
- Upcoming events and activity calendar
- Students birthday reminder

Benefits to Administrators

The software has been designed for effective controlling and functioning of all the departments of the school.

- Complete automation of all operations saves time
- Paperless solution with integrated email and sms facility
- Improved response to the demand of the stake holders through quick response generation
- Well designed and detailed summary reports
- User friendly interface requiring minimal learning of IT skills
