Savischools

school management system with mobile app

what

Savischools is an online school management software designed to handle all school work. Motive of this product is to make school management process easily approachable to all who is related to schools. It can handle various modules like Students details, results, attendance, Teacher/ Staff details & attendance, Tuition fees, Library system, courses, school website etc.

why

School management software is more than just a cloud based technology- it serves from the basic. Managing school operations has never been easier before. With this software school authorities have literally got an improved way of organizing, tracking and billing. Most of all, This system makes interaction easy so that school authorities can easily access to student details, generate attendance reports,

How

Our software is completely customized for both school authority and parents. It helps them access to their individual need virtually and in a complete secured way. We have designed mobile app, EduApp for the parents to keep them connect with the school activities during school hours and keep record of the scheduled classes and performances of kids
