If the organization has a lot of illiterate work force you still do not require a fingerprint sensing time machine. Time records can be punched by supervisors also into our software in minutes. Automate Time record keeping so that your HR team spends less time on data entry and more on productivity.

Marking attendance by Biometric Devices

Mark attendance through Biometric Device/ Fingerprint scanners

1

The attendance is taken by the machine

2

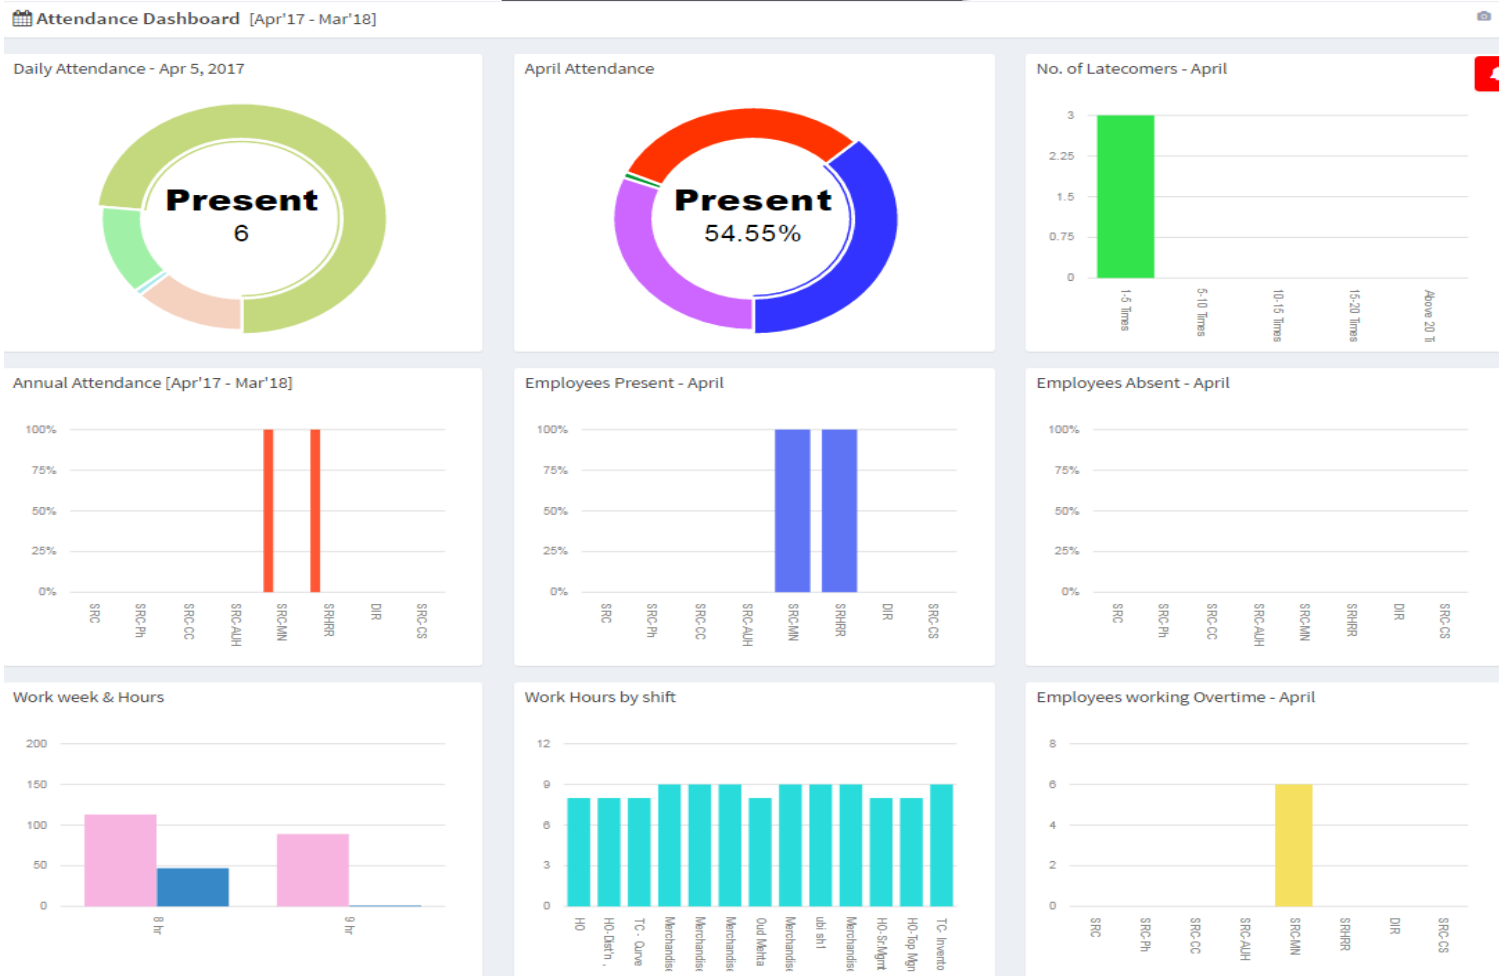

The Time sheets are interfaced in the software.

3

Integrate with overtime & Leave data to process payroll.

It is difficult to integrate the data from Biometric clocks with HR and payroll applications. We ensure that the attendance data through Biometric devices is seamlessly incorporated in our HR software. Our HR software is flexible enough to take care of different shifts and company procedures.

Powerful Dashboards for Time tracking

All your attendance MIS represented in dynamic dashboards. Summarized view of attendance data - different views to interpret data by different angles. Easy to spot the problem areas in the organization. Spotting habitual latecomers is effortless now.

Were all your Marketers absent this Friday? How many customers did you lose? Were most of your HR employees on leave that Monday, when your company had important placements and interviews? How many institutes thought of your company as unreliable? Let all these things be just one of your bad dreams, and never the reality. Keep a track of the departmental absenteeism
