With Spine Assets manage assets optimally; Assign-Transfer-Retire, Maintain-Service, Warranties-Insurances, Licenses-Documentation.

### Fixed Asset Compliance

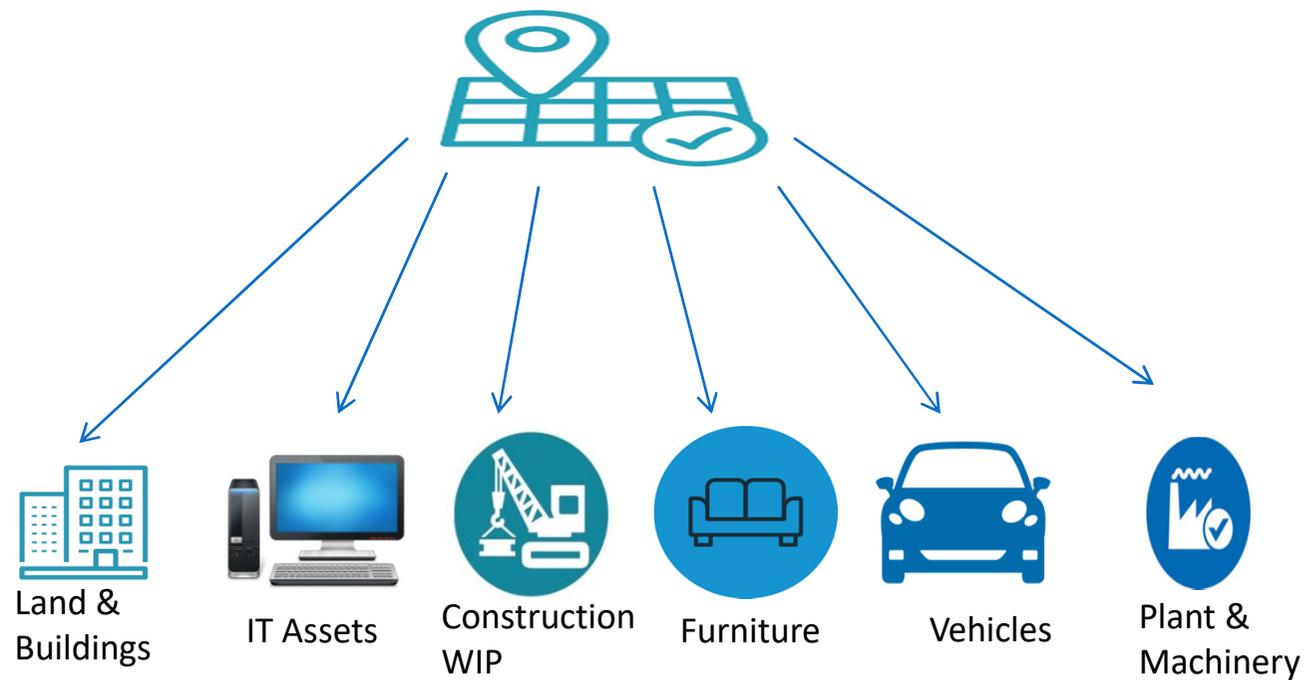

Depreciation accounting is keeping in view the requirements of India Companies Act, Income Tax Act as well as Management Act

**TRACKING,  
MANAGEMENT  
&  
COMPLIANCE**

A complete asset management system helps in effectively Tracking the Fixed Assets in your organization.

Asset Tracking is ideal for any Organization looking to streamline their asset inventory processes using barcode and/or RFID technology.

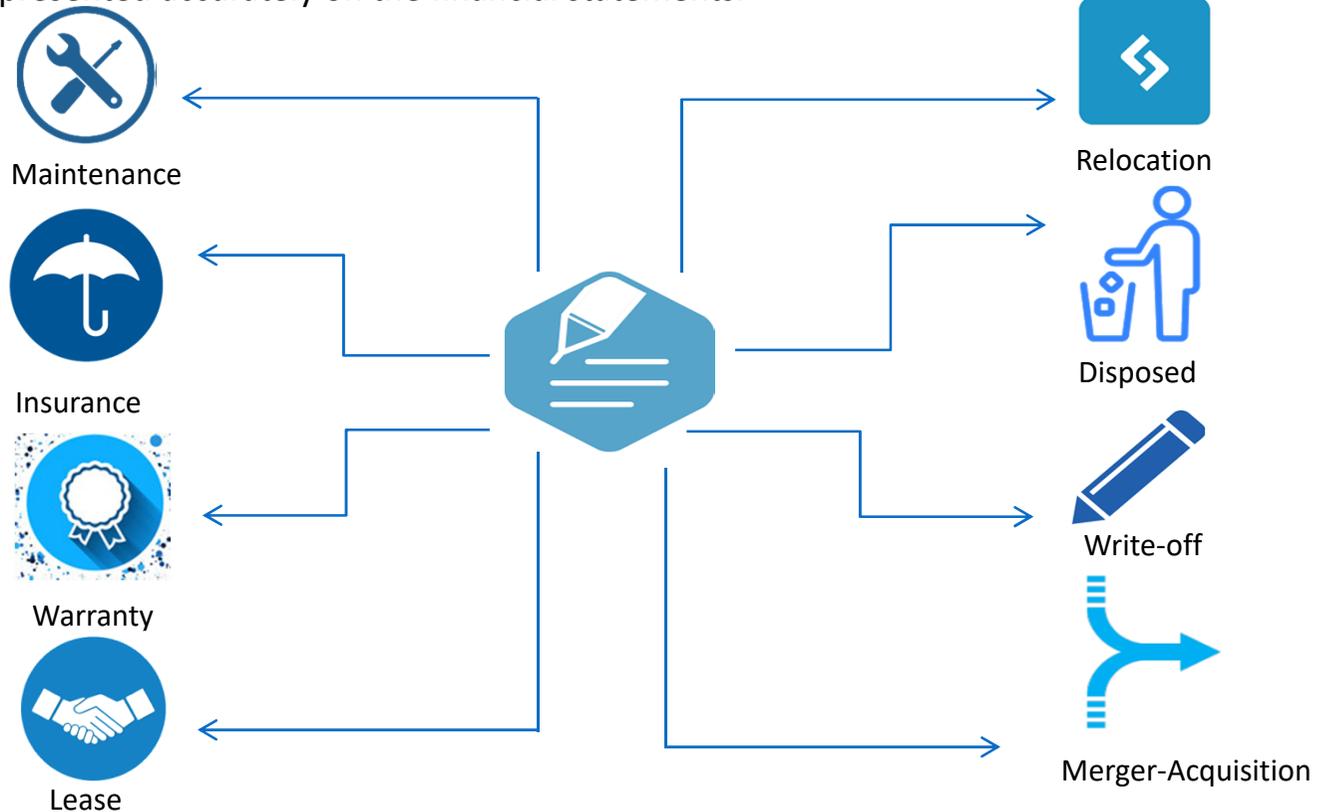

**SPINE ASSET  
MANAGER  
TRACKING**

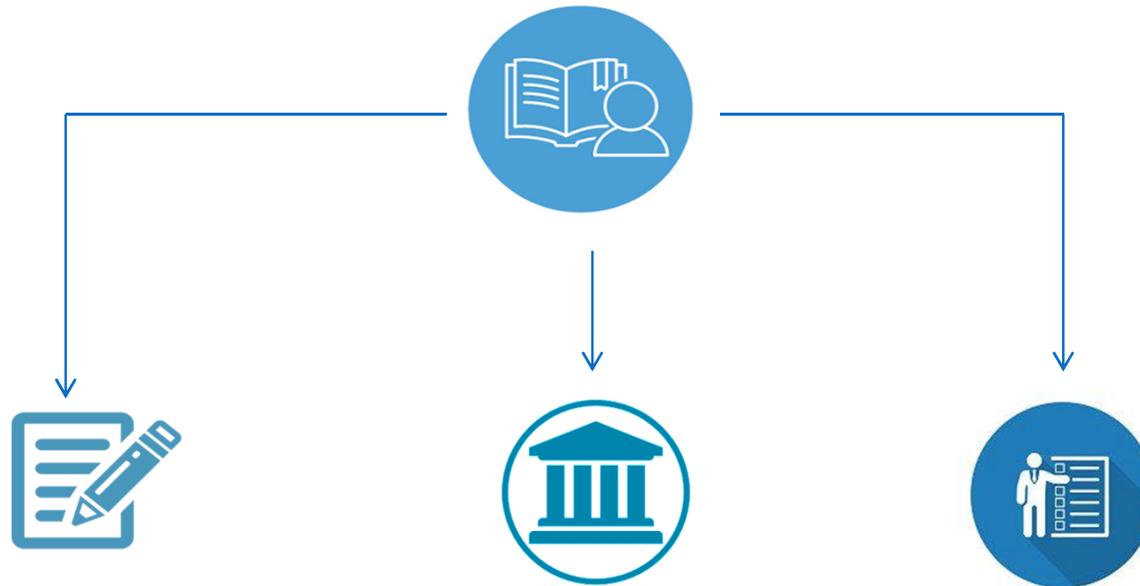

Users maintain and control end-to-end asset lifecycle for both depreciating and non-depreciating assets, right from creation to depreciation, to revaluation and disposal.

Spine Asset supports extensive asset management, including maintenance schedules and insurance, while providing tight accounting integration so that the fixed asset information of the users is always presented accurately on the financial statements.

Asset Depreciation can be calculated in adherence to multiple compliance such as New Companies Act 2013, Income Tax Act, and Management Act.

Companies Act 2013

Income-Tax Act

Management Act

**SPINE ASSET  
COMPLIANCE**

Spine Asset Manager intelligently create codes for each Fixed Asset which helps in Physical verification and tagging services of Fixed Assets to organizations across all industries as the first step to implement Enterprise Asset Management.

This helps in knowing exactly what assets you currently have, where these assets are located and how these assets are changing over time, and allows a company to keep track of details of each fixed asset, ensuring control and preventing misappropriation of assets.

Benefits include:

- Identify owned assets quickly and easily with visual inspection
- Track serial or model numbers efficiently with barcode stickers
- Save time and money in duplication of assets between department.
- Increased security with regular tracking & monitoring
- Reduction of theft with visual identification of assets with security labels
- Monitor asset movement between locations
- Compliance with insurance or government regulations
- Track useful life of assets and depreciation schedules
- Schedule maintenance, service and replacement of owned assets

**PHYSICAL  
VERIFICATION  
&  
ASSET TAGGING**

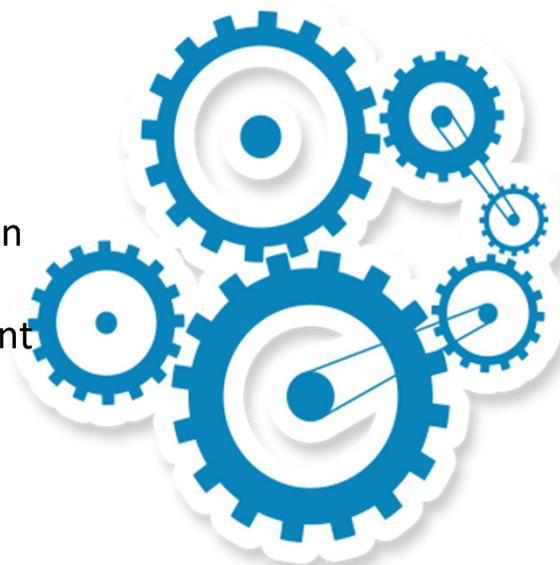

Spine Asset Manager helps in Budget Tracking on Year/ Asset Group / Location / Cost Center / Custodian wise.

Budget v/s Actual Acquisition & Budget v/s Actual Depreciation in terms of value & quantity as well.

## COMPONENT COST-BREAKUP

- Identification of component and their useful life is most important factor for the company as well as identification of asset for which component accounting is applicable is a subject matter of company's practice or policy
- Where one Fixed Asset comprises of different items of fixed assets which are significant to the total cost of main asset and their useful life is different from the useful life of main asset
- In view of the silent provision contained in the Companies Act, 2013, the company may depreciate its insignificant component of main asset over the useful life of main asset

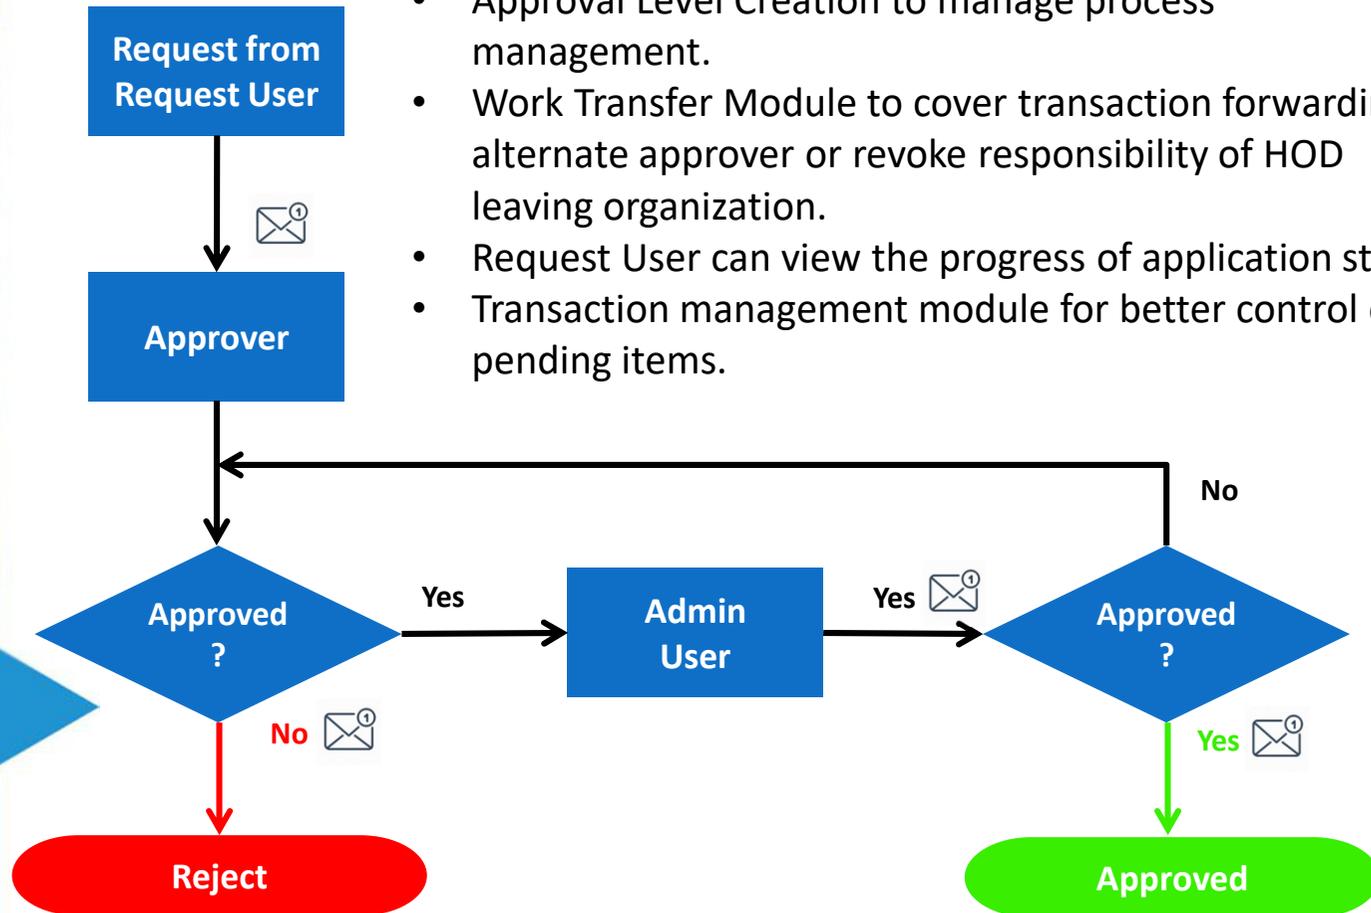

- Facility to create Request Category & Sub-Category.
- Comprehensive Work Flow can be mapped with multiple Request Categories.
- Request User can submit Request / Concern / Queries online related to their issues to ADMIN / IT / ACCOUNTS or Any other matter.
- Transaction can be review & will be escalated to respective department.
