

Hospital Management Software.

XIPHIAS Hospital Management System (XHMS) is a workforce planning and workload management system that provides dynamic data for clinicians, department managers, hospital executives and high level healthcare planners. Core planning components within the system ensure best practice. This implements all the activities of the hospital in a computerized automated way to fasten the performance with a Zero error value. This responsive software interacts with all the stakeholders at every level of the hospital to ensure compliance by one and all. XHMS maintains the patient details, lab reports and calculates the bill of the patient. Any detail can be manually edited with prior permissions. It gives a procedural approach regarding how a patient gets treatment, details about date of treatment and finally other criteria like room allocated, lab reports, treatment and medicine taken so on and so forth. During billing, health card facility is also considered.

Current demands on the public and private healthcare sectors require health care facilities to be highly focused on best practice outcomes for patients, productivity and efficiency.

XHMS provides a gold standard solution enabling health care facilities to meet these ever-increasing demands on resources by providing an innovative and integrated solution which facilitates resource planning and episode of core costing.

XHMS is a multi award-winning company operating internationally and is recognized as an industry leader in providing health care management solutions that are effective in the current environment and essential for planning and funding healthcare resources for the future.

Based on our understanding of the realities and challenges of the health care industry, we have developed software that provides a 'big picture' approach, offering benefits for patients, staff, health care facilities, ministries of health and the community.

Benefits

Healthcare Management	Billing management	Scalable	Import information	Seamless communication	Highly flexible	Complete Reports
Zero Data redundancy	Highly Secure	User friendly	Multi-tasking	Response time	Less inventory costs	Pharmacy connect

"INNOVATION BEYOND IMAGINATION"

Hospital Management System

XHMS is an integrated multidisciplinary solution that interfaces seamlessly with other healthcare solutions and offers a wide range of clinical and management functions for medical, allied health, nursing and non-clinical health care services. Customised electronic dashboards for displaying core capacity in all areas of a facility and multi-disciplinary electronic handovers are developed on request.

- Projects and manages inpatient care requirements and proactively manages staffing to meet peaks and troughs in inpatient care demand
- Measures, trends and reduces variances between the demand and supply of nursing resources in order to maintain safe and cost effective patient care
- Allocates fair and equitable workloads to nursing staff in each department and across the organization
Reduces and expands roster profiles in accordance with increases and decreases in patient acuity and bed utilization to maximize patient safety, minimize waste and reduce nursing fatigue
- Monitors and trends the staff skill mix in each nursing department, to ensure care requirements are met and the cost per hour is retained within budget
- Measures patient turnover (churn) and bed utilization on each shift for every day of the week
- Identifies reasons for late and cancelled discharges providing opportunities to improve efficiencies and reduce nursing workloads
- Maintains dynamic and comprehensive clinical handovers for all disciplines based on the international standard SBAR
- Identifies nursing and allied health intensity per episode of care and DRG for cost weight and budget development
- Provides a dynamic multi disciplinary diet ordering system with extensive reporting

ABOUT US

XIPHIAS aims to be a leading Company in the global IT market through quality, commitment, dedication, enthusiasm and continuous learning, aiming to build human resource and character with a sense of pride. We offer quality services in a timely and cost effective fashion that helps our clients more than just meeting business objectives.

XIPHIAS mission is to create technologies and fuel the communities that power the Participation Age.

We help each customer succeed the first time by aligning and optimizing product, systems, and software development lifecycles with business objectives and customer needs to dramatically improve quality and predictability, while significantly reducing time-to-market and overall costs. We strive to develop a superior software for our users through state-of-the-art technology, innovation, leadership and partnerships.

XIPHIAS Vision values EMPLOYEES as our most important resource. Create VALUE for our customers, employees and shareholders. Ensure SAFETY and Quality in every stage of every process. Demonstrate our CREDIBILITY by fulfilling commitments. To be the choice for optimizing Enterprise Lifecycle Management (ELM.)
