

**Make a  
difference...**

**For your practice  
For your patients**

# Introduction

# DRiefcase Connect

Comprehensive clinic management platform for doctors, polyclinics & small hospitals to improve productivity and manage their practice with unmatched focus on patient health records

- Comprehensive clinic management platform with unmatched focus on patient health records
  - Incumbent software in this domain focus mainly on doctor discovery and appointment management
  - DRiefcase Connect stands out given its focus on **record-management** and improvement in **doctor productivity**
- Other modules include appointment management and e-prescriptions
  - Over time, we will add modules for specialists (nutritionists, etc)
- DRiefcase Connect is already available on Android and the web version is under development

# Key Features

- DRiefcase Connect is about providing doctors technology that lets them focus on what really matters: the patient
- Designed with input from doctors, our streamlined systems remove distractions that get in the way of care
- DRiefcase Connect is about managing practice – not only the clinic
  - Built to support practices of all size, delivering integrated clinical solutions and services, for affiliated and independent practices alike

## UPLOAD DOCUMENTS USING THE IN-APP CAMERA

And you don't have to do it, we will train your assistant!

## UNIQUE PATIENT CHECK-IN FEATURE

And you can save an hour a day using this

## GENERATE PRESCRIPTIONS IN A JIFFY

Again, typed or scanned – that's your choice!

## APPOINTMENT MANAGEMENT

Simplify administrative tasks. Reduce no-shows with automatic patient reminders as well!

We aim to improve not only the quality of care but also the productivity of the caregiver!

## Key Features (Cont'd)

- DRiefcase Connect is about providing doctors technology that lets them focus on what really matters: the patient
- Designed with input from doctors, our streamlined systems remove distractions that get in the way of care
- DRiefcase Connect is about managing practice – not only the clinic
  - Built to support practices of all size, delivering integrated clinical solutions and services, for affiliated and independent practices alike

### DOING YOUR DATA ENTRY

You did not study medicine to do data entry. Our patient check-in & clinical notes can be customized to capture data - be it for your research, presentations, etc

### MAINTAIN CLINICAL NOTES

Again, typed or scanned – that's your choice!

### MULTI-CLINIC & MULTI-ROLE SET-UP

Set up multiple roles for each of your team members and each of your clinics and access each of our features for every clinic

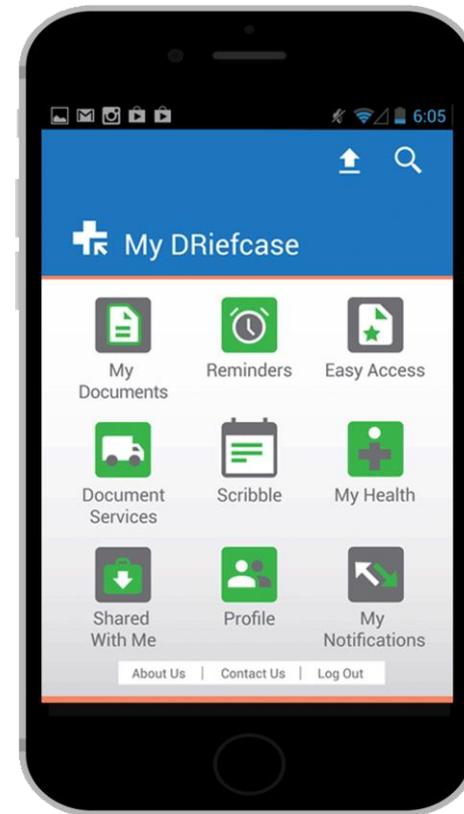

### GET YOUR PATIENTS TO E-MAIL YOU THEIR RECORDS

You can also choose to share documents with them too

We aim to improve not only the quality of care but also the productivity of the caregiver!

# Empower Patients With Our Patient App

- **DRiefcase** - our online patient app and portal empowers your patients by giving them the access they need to actively participate in their care.
- With our secure online patient portal, patients get instant access to their records, including diagnosis, medication, immunizations and procedure history anywhere, anytime (provided you have chosen to share)
- Updates to patient records are available in real-time.
- Patients can share documents with their you through their app, so that they can avoid an unnecessary trip to the clinic or avail of your care even when out of town.

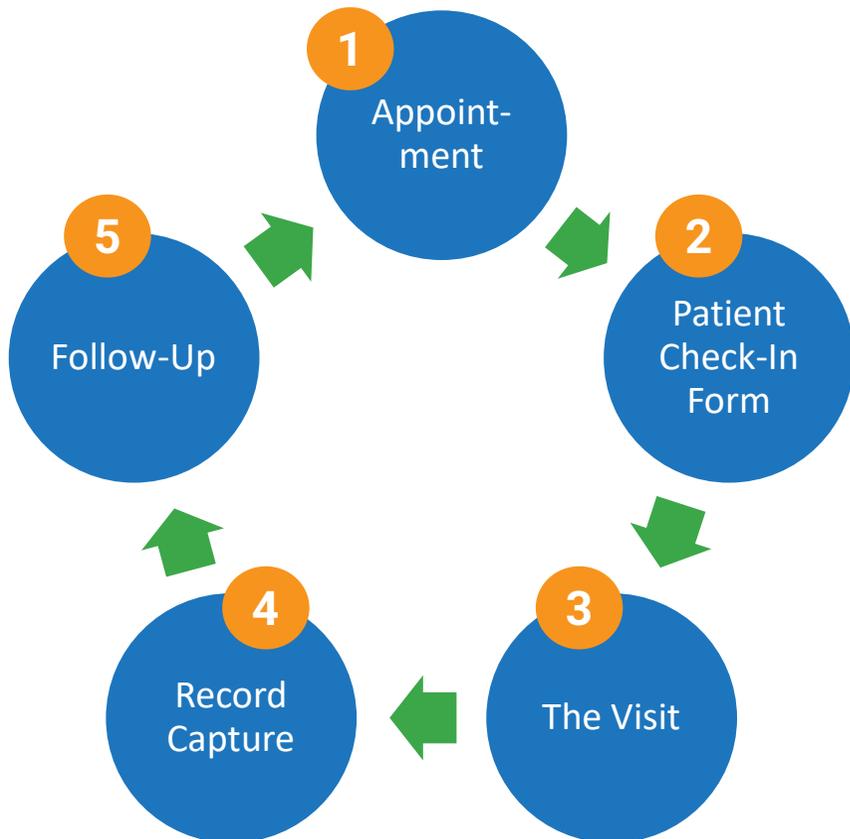

Over time, we will build on the seamless integration between the two platforms to enhance our offerings, bring both the patient and the caregiver together (such as chat, healthfeeds, billing, etc).

# How It Works

# The Doctor-Patient Journey

- DRiefcase Connect is designed to focus on medical record-management and improvement in doctor productivity
  - Our endeavor is to save as much as 1-2 hrs per day of productive time for medical practioners
- We have thus built in features that lead to **minimal disruption** in workflow for the doctors
  - Unique Patient Check-in Module
  - Intelligent & Flexible Input Methods
  - Upload Through Email
- Going forward, we shall continue to refine these and also bring in new features that will lead to further improvement, not only in the patient experience but also in doctor productivity

# The Doctor-Patient Journey

The screenshot shows the 'Appointments' screen in the Driefcase Connect mobile app. At the top, there's a blue header with a back arrow and the word 'Appointments'. Below that is a dropdown menu for 'Marine Lines'. A 'Select Day' section features a calendar for February 2019, with the 8th of February highlighted in green. Below the calendar is a 'Select Time' section with two time slots: '9:30AM' and '9:45AM'. To the right of these slots is a 'Number of Slots' input field containing the number '2'. At the bottom, a summary box displays 'Friday, 08-Feb-2019 9:30 AM to 10:00 AM for Dr. Harsh Parikh at Marine Lines clinic' next to a green 'Confirm' button. The app's status bar at the top shows various icons and the time '1:27'.

## 1 Appointment

- The Appointment module at Driefcase Connect allows doctors to schedule appointments quickly and with flexibility to suit their practice
  - Doctors / Assistants can manage appointments across multiple locations on the go
  - They can choose to vary the number of “slots” they allot a particular patient
  - At the same time, they can also choose to allot the same slot to multiple patients, if that is a system they follow
- On confirmation of the appointment, an SMS & e-mail is sent to the patient
  - A unique patient check-in form is also sent simultaneously via SMS and e-mail
  - On the morning of the appointment a reminder SMS is sent to the patient about the appointment
  - Further, an email with all the appointments for the day is also sent to the Doctor every morning

Organize Health. Be in Control.

## Patient History

Please fill/update following form.

Last Updated: Jan 4 2019  
12:15PM

### Introduction

Name:

\_\_\_\_\_

Date of Birth

\_\_\_\_\_

Age

\_\_\_\_\_

Regd. No.

## 2 Patient Check-In Form

- The patient check-in form is one of the key-productivity enhancements tool that Driefcase Connect offers doctors
- On set-up, a **customised web form** is created for **EACH** doctor, that is sent by SMS/email to patients to fill online prior to arrival for the appointment
  - The form typically consists of important questions that the doctor asks the patients on each visit (especially new patients)
- Once the patient fills out the form, the same is submitted to the doctor for review at the time of or before the appointment
  - The doctor has the option to edit the form based on his conversation with the patient (which is the basis of further diagnosis and prescriptions)
- With this, DRiefcase can be customized to EACH doctor and his/her style of practice
- We believe, that if the check-in form is properly implemented, it can easily save the doctor 3-5 minutes per patient i.e. 1-2 hours per day

# The Doctor-Patient Journey

The screenshot shows a mobile application interface for a medical form. At the top, there is a blue header with a back arrow and the text 'Harsh Chat'. Below this is a navigation bar with several tabs: 'Information', 'Documents & Notes', 'Medical Information', 'Health Card', 'Patient History' (which is highlighted in green), and 'Vaccines'. The main content area contains several sections:

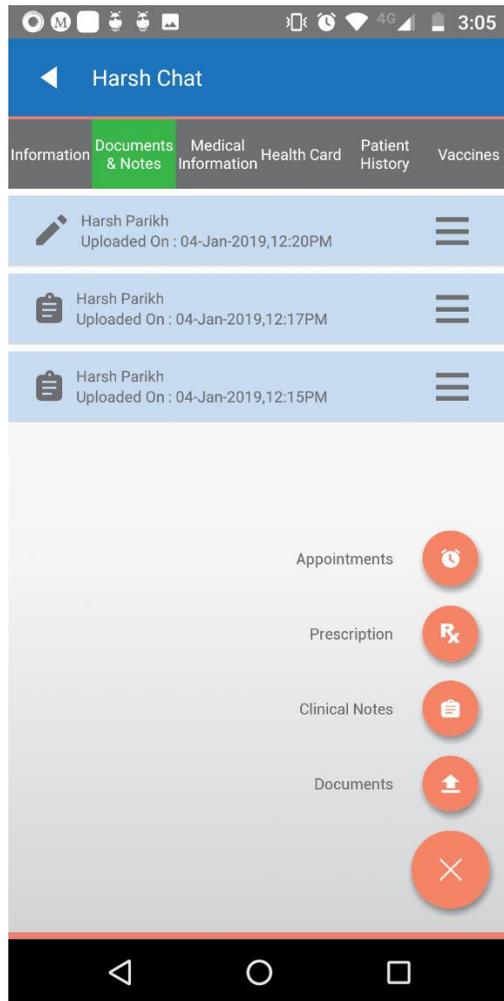

- A section with the question 'Any more complaints?' followed by two radio buttons labeled 'No' and 'Yes'.
- A section with the question '6) Any more complaints (2)' followed by two radio buttons labeled 'No' and 'Yes'.
- A blue header section titled 'Past History'.
- Section '1) Nature:' with a text input field labeled 'Enter data'.
- Section '2) Year of Occurrence' with a text input field labeled 'Enter data'.
- Section '3) Duration:' with a date picker labeled 'Select date'.
- Section '4) Any recurrence?' with a text input field labeled 'Enter data'.
- Section '5) Any additional past history?' with a text input field.

At the bottom of the form, there are two green buttons: 'SAVE' and 'SAVE AS PDF'. The entire form is displayed on a mobile device screen, with a status bar at the top showing the time as 3:01 and various system icons.

## 3 The Visit

- At the time of the patient visit, the doctor can use the form to assist in the conversation and document the same
  - While the form is more helpful for new patients, the doctor can use the “**Clinical Notes**” module to update notes from each subsequent visit
- **E-prescriptions** can also be issued for **medication** as well as **diagnostic tests**
- Patients can **e-mail** other relevant medical documents to the doctor for reference which can be saved in his card
  - The doctor can also take photographs of the same to upload in the patient card
- The initial form, clinical notes, e-prescriptions and other relevant uploads will be saved in reverse chronological order

# The Doctor-Patient Journey

## 4 Record Capture

- Integrated with Google's voice and hand-writing recognition to allow doctors the flexibility to type, hand-write or dictate clinical notes / prescriptions
- If the doctor doesn't wish to type, DRiefcase Connect offers the option to train assistants to take photographs of hand-written notes/prescriptions and upload them for future reference
- Doctor can share the prescription with the patient through the DRiefcase app or through native email / messaging apps
- DRiefcase Connect can also work with the doctors to digitize the same as per an agreed customised protocol
- Our ability to capture data for doctors can help Doctors find similar cases and also assist them in their research, papers, presentations, etc - This follows our endeavor to save doctors 1-2 hours of productive time per day

## 5 Follow Up

- For subsequent visits, the doctor can either ask patients to update the initial check-in form or use the "Clinical Notes" module to update notes from each subsequent visit himself
