Design Beautiful Certificates & Badges

- Create designs from scratch or choose a pre-made template
- Upload & customize existing branded certificate designs
- Certificates can be accessed anywhere, on any device
- Certificates and Badges are instantly verifiable (Verification Widgets, QR Code, and Meta data)
- Custom text placeholders that can be automatically populated from uploaded data
- Custom image placeholders that can be automatically populated from uploaded data

Hassle Free Delivery of Certificates & Badges

- One-click delivery and e-mail notifications (White-labeled, SMTP, fully customizable)
- Thousands of credentials created, delivered, and notified in one click via CSV upload
- Attach information about your organization, skill, links to your website, course, etc to drive traffic
- API Integration - Integrate with existing LMS, ERP, HRIS, etc., to automate issuance & email notification.

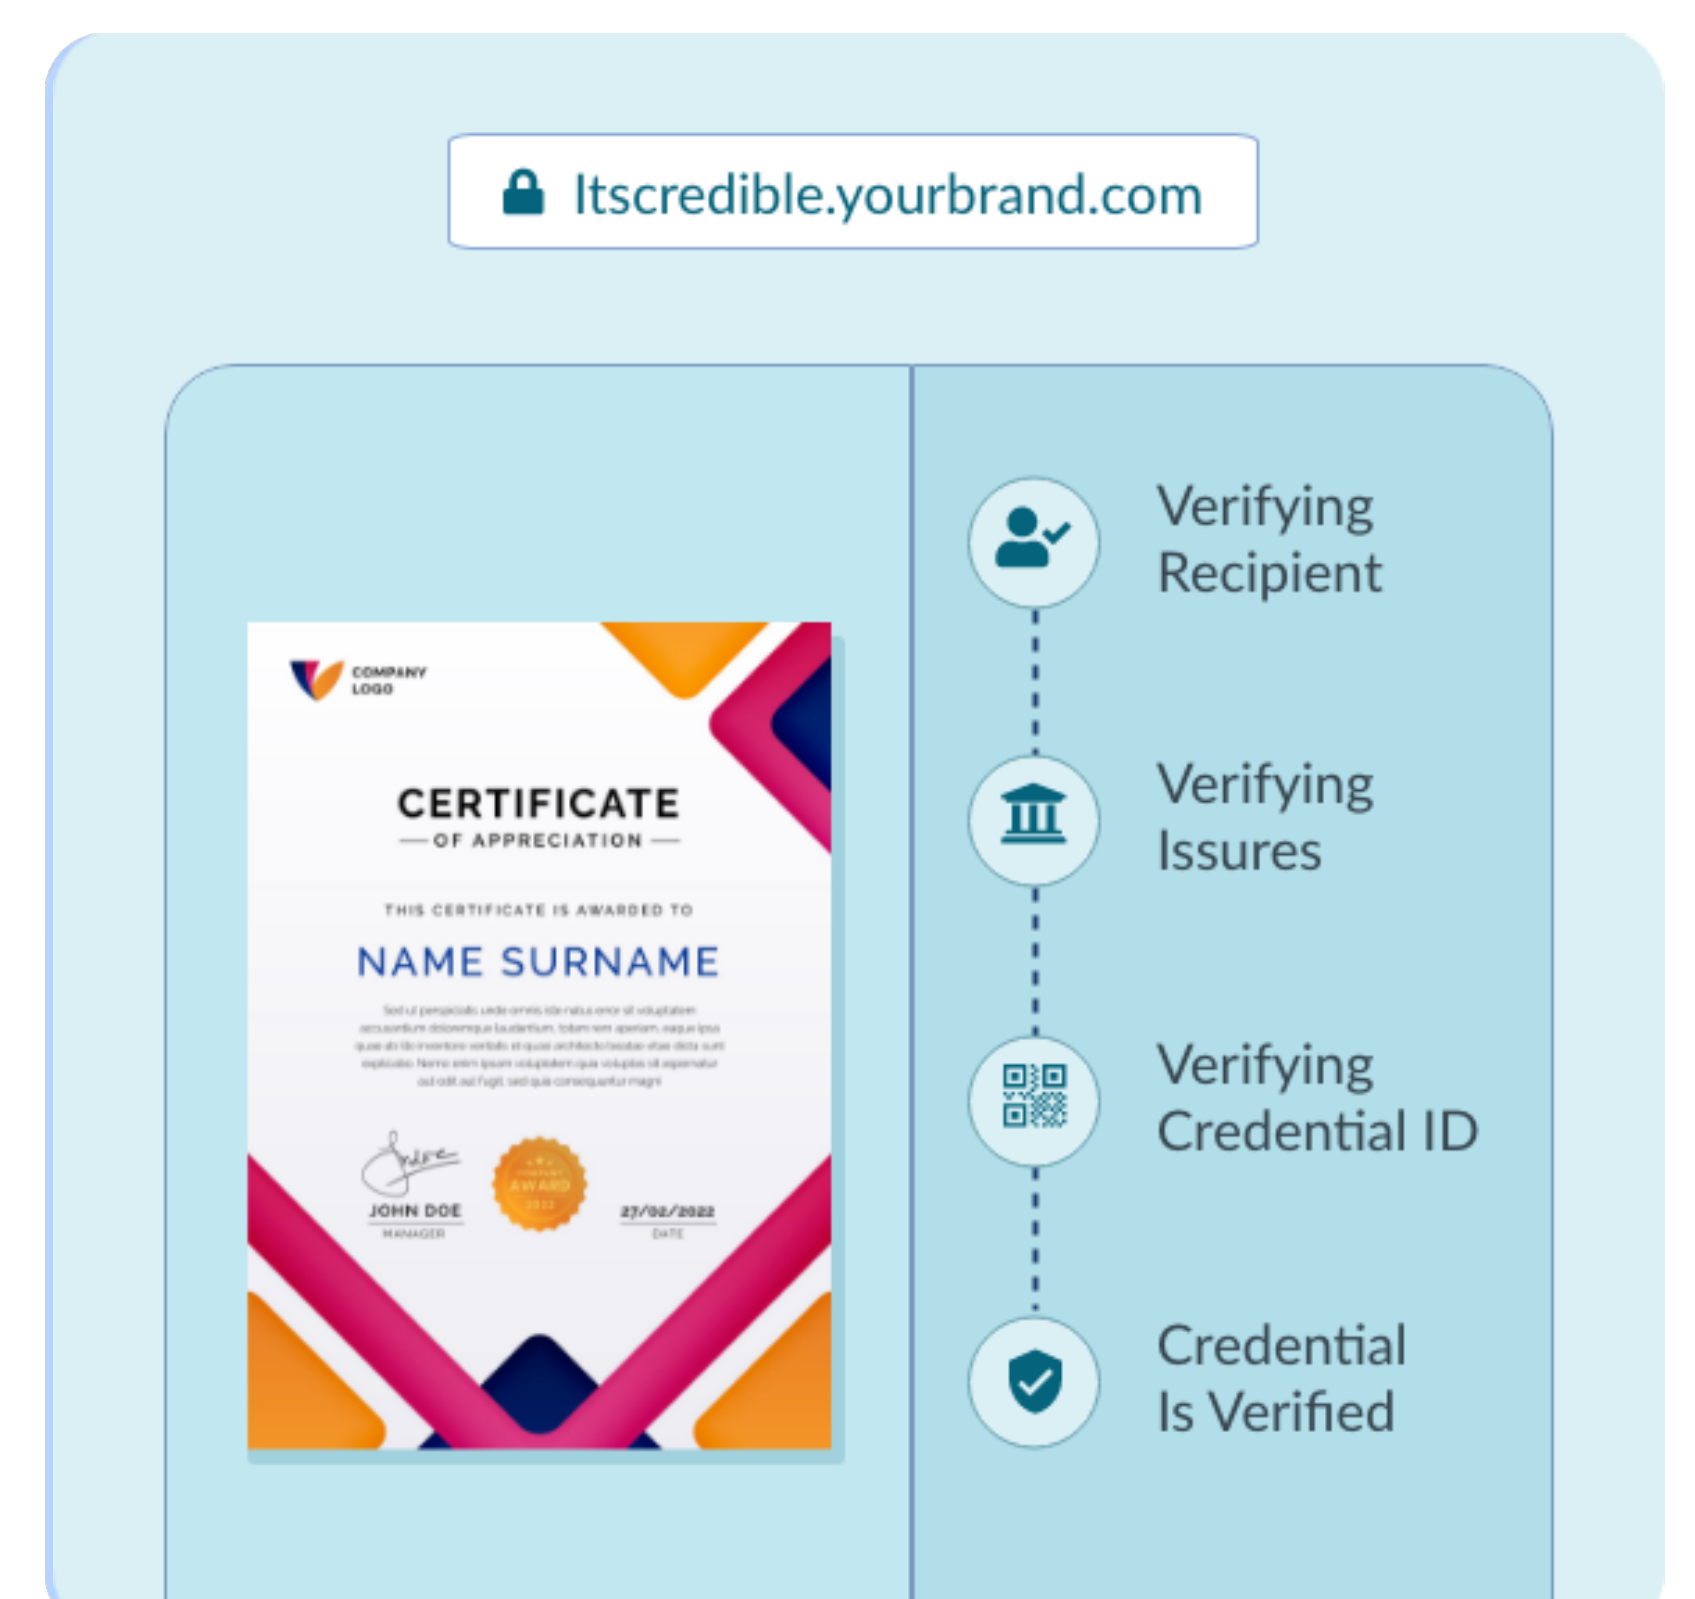

Analytics and Reporting

- See number of credentials issued but not opened
- See the count of number of times a credential was shared on LinkedIn, WhatsApp, Twitter, etc
- See amount of traffic generated by your credentials
- Reward the person with the maximum shares

Increased Security

- NFT & blockchain technology to ensure documents are tamperproof.
- Each document has a unique QR code and reference number that can be instantly verified.
- A verification widget on your website to allow people the ability to verify a certificate on their own to reduce verification load.
- Ensure validity of the certificates by adding issue and expiry date to the certificates.
- Only credible organisations can issue documents - with a rigorous onboarding criteria.
