Welcome to Quizgecko, your one-stop platform for creating, sharing, and managing quizzes. This article will help you get started and make the most out of Quizgecko.

How do I make a quiz?

Quizgecko offers a range of options to generate questions in just seconds. Alternatively, you can add questions individually.

Try an example: Gandhi, Battle of Hastings, and technical documentation.

Text   Topic   URL   Uploads ♛   Manual

Enter Your Text

Copy and paste some text here. Maximum 25,000 characters.

A. Questions from Text

To create questions from any text:

1. Paste the text in the input box under the "[Create Quiz > Text](#)" tab.
2. Quizgecko will intelligently generate a set of questions based on your input.
3. Review and select the questions you want to include in your quiz.

B. Using URLs to Generate Questions

With Quizgecko, you can use web content or YouTube videos to generate questions.

1. Creating Quizzes from Webpages:

Enter the URL of the webpage in the "[Create Quiz > URL](#)" input box, and Quizgecko will generate questions based on the webpage content.

2. Creating Quizzes from YouTube Transcripts:

Input the URL of a **YouTube video** in the "[Create Quiz > URL](#)" input box. Quizgecko will then generate questions from the video's transcript.

C. Generating Questions from File Uploads

Quizgecko supports a range of text-based files including, PDFs, Word, and Google Doc files for question generation.

1. Click on "Uploads" in the "[Create Quiz](#)" section.
2. Select the file from your device.
3. Quizgecko will then generate questions based on the uploaded file's content.

(Note: This feature is available on premium plans)

D. Manual Input of Questions

You also have the option to manually input questions:

1. Click on "Add Question" in the Quiz Editor.
2. Type in your question and answer options.
3. Set the correct answer and save your question.

III. Editing and Adding More Questions to a Quiz

After you have generated your quiz, you can easily add, edit or delete questions.

A. Editing Questions

1. In the Quiz Editor, click on the question you want to edit.
2. Modify the question text or answer options as desired.
3. Click on "Save" to confirm changes.

B. Adding More Questions

1. In the Quiz Editor, click on "Add Question".
2. Follow the same process as creating a new question (as outlined above).

IV. Navigating Quiz Settings: Changing Behavior and Display

Quiz settings allow you to customize your quiz's behavior and appearance. For example, you can skip the flashcards, require an email address and add a summary.

A. Customizing Quiz Display

Adding a cover image to a document is simple and can add a professional touch to any document. With a few simple steps, you can quickly add a cover image to any document.

You also have the option to customize the document even further. For example, you can hide any of the following elements in your document:

- Hide flashcards

- Hide summary notes

- Hide question preview

- Hide description

B. Changing Quiz Behavior

In the "Quiz Settings" section, you can modify settings like question order, whether to redirect directly to the quiz, skipping the overview, or preventing restart.

V. Sharing & Embedding Quizzes

A. Sharing Your Quiz

1. Once your quiz is ready, click on "Share". From there, you can copy the public share link.
2. You can share the quiz link via email, social media, or direct link.

By default, the quiz is shareable with just the link, but you can change these settings and just invite specific people:

Share Your Quiz   ✕

Share Link   Embed

Visibility

Public   ⌄

Anyone with the link can access your quiz. If you want to keep track of participants, visit the quiz settings and optionally require users to enter their email before taking the quiz.

Invite Specific People

Enter email addresses		Invite

We'll email them a unique link to take the quiz. You can paste multiple email addresses separated by commas or spaces.

Share this link: https://quizgecko.com/quiz/pythagoras-E2fddY

B. Embedding Your Quiz

1. Click on "Embed" in the Share options.
2. Copy the given code and paste it in your website's HTML editor where you want the quiz to appear.

VI. Advanced Features

A. Utilizing Quizgecko's API

With Quizgecko's API, you can seamlessly integrate Quizgecko into your own app or website. For more detailed information on API integration, please refer to our API documentation.
